**Note: Minimum Mass** ('Mass in running order' on Certificate of Conformity and 'Mass in Service' on V5C form) is defined according to European Type Approval and include all fluids, tools, 90% fuel load and driver (75kg). It is minimum mass for this variant and does not consider local specification/trim. Weights are also subject to manufacturing tolerances (EU Legislation allows 5% tolerance). **Payload** figures do not allow for the weight of the driver, or any passengers, which should therefore be deducted from the figures shown. UK and Ireland Specification adds radio and deadlocks to base vehicle adding 10kg. Sportive specification adds a further 45kg to Sportive L1 Panel Van and 30kg to Sportive L2 Panel Van. **Gross plated weights** (including axle weights) quoted on the vehicle plate are to UK and Ireland plated weight specification and must never be exceeded. **Roof load** should not exceed 100kg on H1 models including the weight of the roof rack/carrier.
