Spare wheel kit available as aftermarket optional extra. Please consult your local Opel Dealer.

ALL-NEW OPEL MOKKA

ALL-NEW MOKKA-e PERFORMANCE

Single-speed electronic drive selector

As the motor is an all-electric single-speed drive unit, there is no need for multiple gears. Instead, the shifter lets the driver select from the following:

- Park
- Reverse
- Neutral
- Drive
- Braking (for increased regenerative braking)

Drive Mode Selector

The driver can determine the driving style through selecting one of the following modes:

- Sport: for a dynamic drive with a responsive throttle and the highest top speed and torque.
- Normal: for a balanced drive that offers a compromise between performance and energy efficiency
- ECO: for maximum range and energy efficiency. The ECO mode deactivates all unnecessary energy-consuming features and reduces the top speed, torque and overall performance.

Charging

The Mokka-e's charging flap's Padlock LED lights up when the cable is correctly plugged in and locked and then acts as a user interface to show the charging status via coloured LED lights:

- White: welcome light that helps to light up the area, especially useful in dark conditions
- Flashing green: charging in progress
- Solid green: charging complete
- Solid blue: delayed charging toggled; changes to flashing green when charging commences
- Solid red: malfunction

The driver may also choose from two settings:

- Immediate charging (the standard setting): Starts charging as soon as the vehicle is docked for charging;
- Delayed charging: This is especially useful for when cheaper electric rates are desired, e.g. charging at night. Simply enter a charging start time.

E&OE October 2024. *Images shown for illustration purposes only.

PERFORMANCE	MOKKA-e
Maximum power kW / bhp	100 / 136
Maximum torque Nm / lb. ft.	260 / 192
