# LIFE IS GRAND.

## WHAT ARE YOU WAITING FOR?

It's been a long time since you followed your intuition. Don't let fate decide where you want to go. Take the wheel and celebrate your newfound freedom by driving like you used to and welcome a new thirst for adventure. The Grandland X Hybrid4 is set to arrive. Go for it!

## WELCOME, HYBRID FLEXIBILITY.

Grandland X Hybrid4 gives you more than just another SUV. With Plug-in Hybrid technology it charges like a fully electric vehicle, with up to 300PS from the combined petrol-electric powertrain. It achieves all this while keeping your emissions low and costs down. If we're talking figures, that's up to 1.4l/100km with CO<sub>2</sub> of only 34g/km. Ask your local Opel dealer for more information on the arrival of Opel's first ever hybrid powered vehicle.

These figures were obtained using a combination of battery power and fuel. The Grandland X Hybrid is a plug-in hybrid vehicle requiring mains electricity for charging.  
\*Fuel consumption figures are determined according to the WLTP test cycle. Full data relating to WLTP test cycles can be found at: opel.ie  
\*\*CO<sub>2</sub> emissions figures are determined according to the WLTP test cycle however, a Government formula is then applied to translate these figures back to what they would have been under the outgoing NEDC test cycle, which WLTP replaces.

# WELCOME, PLUG-IN-HYBRID TECHNOLOGY.

## POWERFUL SHAPES, THE HYBRID WAY.

From its powerful combination of petrol and electric engine to its custom-made interior and exterior design – clearly everything about this SUV feels good. Unique to the Grandland X Hybrid4, the 19-inch bi-colour diamond-cut alloy wheels are sure to get you noticed. And there are many other outstanding details, just take a closer look.

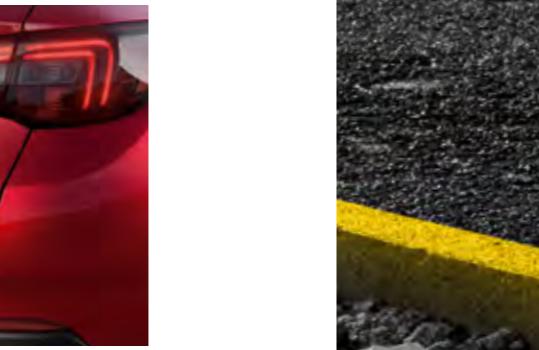

### SMOOTH ON THE INSIDE

A sophisticated 8-speed electrified auto transmission operates four different driving modes: standard Hybrid mode, 4X4 for difficult conditions, Sport mode for a more dynamic drive, and Electric only for zero emissions. On the move, a menu of easy to understand information displays in either the infotainment display or the instrument cluster. This includes energy usage and range, charging information and driving modes.

**DISCOVER NEW POWER SOURCES**  
Your freedom of choice: charged like a fully electric vehicle, the Grandland X Hybrid4 can drive a reasonable distance with electric engine only.

### HYBRID4 TECHNOLOGY

A powerful powertrain comprises a 1.6 litre turbocharged direct injection petrol engine and two electric motors, producing up to 300PS and 520Nm of torque combined. An electrified rear axle provides true AWD capabilities on-demand.

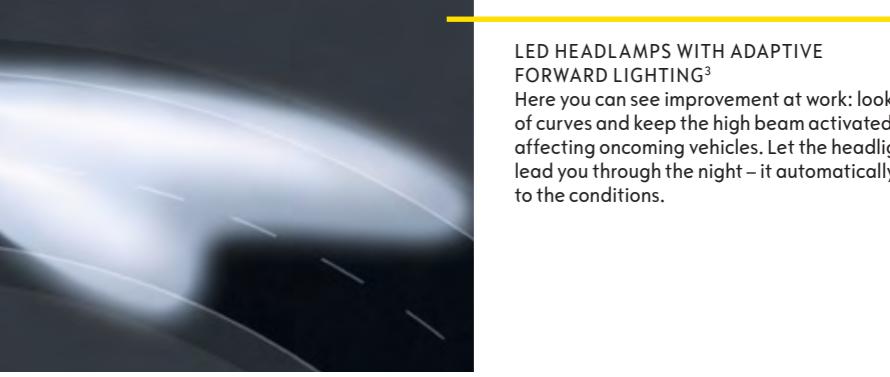

# WELCOME BACK, INGENUITY.

**AUTOMATIC EMERGENCY BRAKING<sup>1</sup>**  
can independently recognise dangerous situations on the road ahead and warn the driver acoustically. If another car or a pedestrian gets too close, the system decelerates your car. It even brings it to a standstill for speeds of up to 30 km/h.

**LED HEADLAMP**  
The advanced economical lighting technology saves electrical power and thereby reduces fuel consumption.

**AUTOMATIC CRUISE CONTROL<sup>2</sup>**  
Sees ahead and maintains a safe distance from the vehicle in front at speeds between 30 and 180 km/h. The automatic acceleration and braking is extremely comfortable on long trips.

<sup>1</sup>Standard on Elite and Ultimate. Optional on SRI models as part of the Safety Pack. Automatic Emergency Braking with Pedestrian Detection works automatically above 5 km/h and below 140 km/h. From 5 to 30 km/h the deceleration metric to reduce the impact speed of the collision is 0.9 g. From 30 to 140 km/h the system reduces the speed by a maximum of 50 km/h. Above this threshold, the driver needs to brake himself/herself to reduce the speed even further. Operational speed range of Automatic Emergency Braking with Pedestrian Detection depends on the detected obstacle (mobile obstacle: from 5 to 140 km/h; fixed obstacle: from 5 to 80 km/h; pedestrian: from 5 to 60 km/h). Opel driver assistance systems are intended to support the driver within the limitations intrinsic to the system. The driver remains responsible for the driving task. Safety Pack also includes: lane keep assist, forward collision alert, automatic collision imminent braking (above 30 km/h) and driver drowsiness alert.

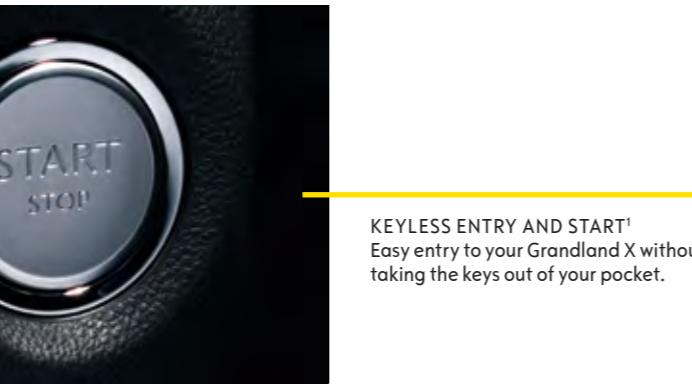

<sup>2</sup>Standard on Ultimate.

<sup>3</sup>Standard on Ultimate, optional on all other models as part of Park and Go pack Two.
