General information

The Infotainment system provides state-of-the-art in-car information and entertainment.

The radio is equipped with assignable channel presets for FM, AM and also DAB wavebands (depending on version).

The audio player can play audio CDs, MP3 CDs and also WMA CDs (depending on version).

External data storage devices, e.g. iPod, MP3 player or USB stick, or a portable player can be connected to the Infotainment system. External audio sources can also be connected via Bluetooth.

The digital sound processor provides several preset equalizer modes for sound optimisation.

The navigation system’s dynamic route planning will reliably guide you to your destination and can help avoid traffic jams and other traffic problems.

Optionally, the Infotainment system can be operated using controls on the steering column or via the voice recognition system.

In addition, the Infotainment system can be equipped with a handsfree phone system.

The well-thought-out design of the controls and the clear displays enable you to control the system easily and intuitively.

Note

This manual describes all options and features available for the various Infotainment systems. Certain descriptions, including those for display and menu functions, may not apply to your vehicle due to model variant, country specifications, special equipment or accessories.

Important information on operation and traffic safety

⚠️ Warning

Drive safely at all times when using the Infotainment system.

If in doubt, stop the vehicle before operating the Infotainment system.
Radio reception

Radio reception may be disrupted by static, noise, distortion or loss of reception due to:

- changes in distance from the transmitter
- multi-path reception due to reflection
- shadowing

In case of poor radio reception the volume will automatically drop as to minimize the disturbance effect.

Using this manual

- This manual describes features that may or may not be on your specific vehicle, either because they are optional or due to changes subsequent to the printing of this manual. Please refer to the purchase documentation to confirm each of the features found on the vehicle.
- Certain controls and descriptions, including symbols, displays and menu functions may not apply to your vehicle due to model variant, country specifications, special equipment or accessories.
- The table of contents at the beginning of this manual and within each section shows where the information is located.
- The index will enable you to search for specific information.
- The vehicle display screens may not support your specific language.
- Display messages and interior labelling are written in bold letters.
- The operations given within this manual refer to Infotainment system controls. For equivalent steering column controls, refer to the control elements overview ə.

Warnings and cautions

⚠️ Warning

Text marked ⚠️ Warning provides information on risk of accident or injury. Disregarding this information may lead to injury.

Caution

Text marked Caution provides information on possible damage to the vehicle. Disregarding this information may lead to vehicle damage.

7 Turn: Access display menu options, next/previous radio preset / radio frequency / audio track ............................ 48

Note
Depending on version, the voice recognition button ✖ may alternatively be located on the steering wheel.

Theft-deterrent feature
Depending on Infotainment system, an electronic security system is included for the purpose of theft deterrence. The Infotainment system functions only in your vehicle and is therefore worthless to a thief.

The security code (supplied separately) must be entered upon first use of the system and after prolonged interruptions to the power supply.

Note
The security code is not required for R16 BT USB, CD18 BT USB.

Entering the security code
When first switching on the Infotainment system, an enter security code message, e.g. Radio code followed by 0000 appears on the
display screen. Depending on Infotainment system, the message may only appear after a brief delay. To enter first digit of security code, press numbered button 1 on the unit repeatedly until desired number is displayed. Enter second, third and fourth digits using buttons 2, 3 and 4 in the same way.

When the full code is displayed, press and hold button 6 until an audible signal sounds. The system is unlocked when the correct code has been entered.

**Incorrect code entered**
Depending on Infotainment system, when the security code has been entered incorrectly, an incorrect code message, e.g. Error code followed by a countdown value, e.g. Wait 100 is displayed.

Wait until the countdown has expired, then enter the correct code. Each time the code is entered incorrectly, the countdown time may be doubled, depending on Infotainment system.

**Changing the geographical area**
When the security code is entered, depending on Infotainment system you may be prompted to choose a geographical area, for example:

- Europe
- Asia
- Arabia
- America

Switch off the Infotainment system, then simultaneously press button 1 and 5 and ◄. Then press ◄ or ► until desired area is highlighted on the display screen and set with button 6.

**Usage**

**Infotainment controls**
The Infotainment system is operated via buttons, rotary knobs and/or display menus.

Inputs are made via:

- the central control unit in the instrument panel ◄ 6, or
- the controls on the steering column ◄ 6
- the voice recognition system (if available) ◄ 105
- the touch screen (NAVI 50 IntelliLink, NAVI 80 IntelliLink) ◄ 6

**Note**
Only the most direct ways for menu operation are described in the subsequent chapters. In some cases, there may be other options.

**Switching the Infotainment system on or off**
Press ◄ to switch the Infotainment system on.
The previously used audio source is active.
Press ◄ (or, depending on Infotainment system, press and hold) to switch the Infotainment system off.
Note
The clock and/or outside temperature may be displayed when the Infotainment system is switched off (depending on version).

**NAVI 50 IntelliLink:**
The Infotainment system automatically switches on/off when the ignition is switched on/off. Press \[\text{X}\] instead, if required.

**NAVI 80 IntelliLink:**
The Infotainment system automatically switches on when the ignition is switched on. Press \[\text{X}\] instead, if required.

The following options may be displayed (depending on version):

- **Change settings** (to authorise or reject data sharing)
- **Language** (to change the system language)
- **Done** (to continue to the Home page)

The Infotainment system automatically switches off when the ignition is switched off and the driver’s door is opened. Press \[\text{X}\] instead, if required.

**Automatic switch-off**
With the ignition off, if the Infotainment system is switched on with \[\text{X}\], it will switch-off automatically a short period after the last user input. Depending on Infotainment system, automatic switch-off occurs after approx. 5 to 20 minutes.

Pressing \[\text{X}\] again will allow the Infotainment system to remain on for a further 5 to 20 minutes.

**Setting the volume**
Turn \[\text{X}\]/volume rotary knob, or press \[\text{+}\] or \[\text{-}\].

Alternatively (with the steering column controls), press \[\text{+}\] or \[\text{-}\].

**NAVI 50 IntelliLink:**
Depending on version, it is possible to set various volume levels individually (including audio players, traffic announcements, navigation instructions, phone calls and ringtone).

From the Home page, press \[\text{Settings}\] then **Audio** followed by **Sound** on the display screen.

Refer to (NAVI 50 IntelliLink) "Volume settings" \[\text{341}\].

**NAVI 80 IntelliLink:**
To set various volume levels individually (e.g. navigation instructions, traffic announcements, phone calls) from the Home page, press **MENU** then **System** followed by **Sound** on the display screen.

Refer to (NAVI 80 IntelliLink) "System settings" \[\text{342}\].

**Stored volume**
When the Infotainment system is switched off, the current volume is stored.

**Speed dependent volume**
When speed dependent volume (\[\text{341}\]) is activated, the volume is adapted automatically to compensate for road and wind noise.
Mute
To mute the current audio source (depending on Infotainment system), press \( \text{X} \) briefly or turn knob fully anticlockwise.
Alternatively (with the steering column controls), press \( \text{X} \) or \( \text{X} \) or press \( \text{X} \) and \( \text{X} \) simultaneously.

Unmute
To unmute (depending on Infotainment system), briefly press \( \text{X} \) again or turn clockwise.
Alternatively (with the steering column controls): Press \( \text{X} \) again or press \( \text{X} \) and \( \text{X} \) simultaneously again.

Note
When a traffic announcement is broadcast, the system is automatically unmuted.
For further information, refer to "Radio data system" \( \Rightarrow 53 \).

Display screen operation
R15 BT USB, R16 BT USB, CD16 BT USB, CD18 BT USB - Display screen operation
- To move up/down in the display: Turn \( \text{OK} \).
- To confirm actions: Press \( \text{OK} \).
- To cancel actions (and return to previous menu): Press \( \text{J} \).

NAVI 50 IntelliLink - Display screen operation
Use the touchscreen for the following displayed menus as described in each section:
- \( \text{RADIO/} \text{MEDIA} \)
  Refer to "Radio" section \( \Rightarrow 48 \).
- \( \text{MEDIA/} \text{MEDIA} \)
  Refer to "USB port" section \( \Rightarrow 63 \).
- \( \text{PHONE} \)
  Refer to "Phone" section \( \Rightarrow 108 \).
- \( \text{MAP} \)
  Refer to "Navigation" section \( \Rightarrow 75 \).
- \( \text{NAV} / \text{NAV} \)
  Refer to "Navigation" section \( \Rightarrow 75 \).
- \( \text{Driving eco2} \)
  Refer to "Additional features (NAVI 50 IntelliLink)" in the "Modes of operation" section below.
- \( \text{SETTINGS} \)
  Refer to (NAVI 50 IntelliLink) "Tone settings" \( \Rightarrow 40 \), "Volume settings" \( \Rightarrow 41 \) and "System settings" \( \Rightarrow 42 \).

When the Home page \( \text{Home} \) is displayed, it is possible to hide these menus from the display (only clock and audio system information may be shown) by pressing \( \text{Dark} \). Press anywhere on the screen to display these menus again.

NAVI 80 IntelliLink - Display screen operation
Use the touchscreen for the following displayed menus as described in each section.
On the Home page, press **MENU** on the display screen to access the Main menu. The following menus and controls are displayed:

**Navigation**
Refer to "Navigation" 75.

**Multimedia:**
- **Radio:** Refer to "Radio" 48.
- **Media:**
  - **CD** (only available with Type B and C): Refer to "CD player" 58.
  - **USB:** Refer to "USB port" 63.
  - **SD:** Operation is similar to those for the CD player 58.

**Auxiliary:** Refer to "AUX input" 61.

**Bluetooth:** Refer to "Bluetooth music" 67.

**Pictures:** Refer to "Displaying pictures" in the "External devices" section 73.

**Video:** Refer to "Playing movies" in the "External devices" section 73.

**Phone**
Refer to "Phone" 108.

**Vehicle**
Press to open Eco Driving/Driving Eco², On-board computer and Settings menus.
Refer to (NAVI 80 IntelliLink) "Modes of operation" below.

**Services**
Press to open Navigation services and Settings menus.
Refer to (NAVI 80 IntelliLink) "Modes of operation" below.

**System**
Refer to (NAVI 80 IntelliLink) "System settings" 42.
Introduction

- <\→: Move to previous page
- >/→: Move to next page
- ↑: Display lists; Scroll up
- ↓: Display lists; Scroll down
- +: Open pop-up menu
- ←: Return to previous menu

The display screen can also be operated using the controls on the Infotainment system fascia.

Note
Depending on version, some controls available on the Infotainment system fascia do not operate the features on the display screen.

Note
Depending on vehicle, operation of the touchscreen may be restricted during driving.

Modes of operation

Radio
To change the audio source to radio: Depending on Infotainment system, press RADIO, RADIO/CD or AUDIO/SOURCE.

NAVI 50 IntelliLink
To access the radio menu at any time, press 📆 followed by 📆Radio on the display screen.

NAVI 80 IntelliLink
To access the radio menu from the Home page, press MENU then Multimedia followed by Radio on the display screen.

Detailed description of the radio functions ▶ 48.

Audio players
To change the audio source to CD, USB, AUX, Bluetooth or iPod (where applicable): Depending on Infotainment system, press MEDIA, RADIO/CD or AUDIO/SOURCE.

NAVI 50 IntelliLink: To access the menu for connected auxiliary devices (USB, iPod, BT (Bluetooth) or AUX) at any time, press 📆 followed by 📆Media on the display screen. Press ▼ in top left corner and select auxiliary source.

For Aha® application (available depending on version), refer to "Additional features (NAVI 50 IntelliLink)" below.

NAVI 80 IntelliLink: To access the menu for auxiliary devices (e.g. Audio CD, USB, SD card, AUX input, Bluetooth) from the Home page, press MENU then Multimedia followed by Media on the display screen. Select auxiliary source from the display list.

R15 BT USB, R16 BT USB
Detailed descriptions of:

Navigation, Map (NAVI 50 IntelliLink, NAVI 80 IntelliLink)
Detailed description of the Navigation system ☞ 75, Browse map ☞ 96.

Phone
Use the display options in the following menus to connect mobile phones, make telephone calls, create contacts lists and adjust various settings.

Detailed description of the handsfree phone system functions ☞ 108.
R15 BT USB, R16 BT USB, CD16 BT USB, CD18 BT USB - Phone
To access the Phone menu: Press ☞ or TEL.
To access the phone settings menu: Press TEL and select Phone settings.

NAVI 50 IntelliLink - Phone
To access the Phone menu at any time: Press ☞ followed by ☞ Phone on the display screen.

NAVI 80 IntelliLink - Phone
To access the Phone menu from the Home page, press MENU followed by Phone on the display screen.

Vehicle information (NAVI 80 IntelliLink)
To access the Vehicle menu from the Home page, press MENU followed by Vehicle on the display screen.

Depending on vehicle, the following menus are displayed:
- Eco Driving/Driving Eco²
- On-board computer
- Settings

Eco Driving/Driving Eco²
The following features are available:
- Trip report
 Displays the following data from the last journey:
Average fuel consumption, average speed, total fuel consumption, total distance.

Within the trip report, Eco scoring provides an overall score out of 100 for driving economy. Higher figures indicate better driving economy. Ratings are also given for average environmental driving performance (Acceleration), gearchanging efficiency (Gearbox) and brake control (Anticipation).

To save journey data: Press 'Save' then select the journey type from the following list:
Home/work, holiday/vacation, weekend, trip/tour, personal.

To reset journey data: Press 'Reset'. Confirm or cancel with 'Yes' or 'No'.

Press + to open pop-up menu where trip reports can be compared or to show/hide reports after the completion of a journey.

- **My preferred trips**
  Displays changes in your driving style (when journey data has been saved).

  The 'Summary' tab for each journey type (e.g. Home/work) displays the following: Total route distance, distance covered, date of information update and average driving economy rating out of 100.

  The 'Detailed report'/'Details' tab displays journey record information.

- **Eco coaching**
  Displays advice for reducing fuel consumption.

Scroll through the pages and familiarise yourself with the advice.

- **Eco challenge**
  Displays best, average and current driving economy ratings out of 100 and average fuel consumption (depending on version).

**On-board computer**
Displays the following information since the last reset:

- start date of calculation
- total distance
- average speed
- average fuel consumption
- total fuel consumption

To reset on-board computer and instrument panel trip computer information, press Reset then Yes to confirm.

For further information, refer to "Trip computer" in the Owner's Manual.

**Settings**
The following settings can be changed:

- **Park Assist**
  • Depending on vehicle, press Front park assist or Rear park assist to switch on/off (box is checked/unchecked). Press Done/Confirm to save changes.

- **Volume:**
  Press + or – alongside the volume bar to change volume of the ultrasonic parking assist system. For further information, refer to "Parking assist" in the Owner's Manual.

- **Rear camera view settings** (available depending on version):
  Select to switch rear view camera on/off, change guidelines (static/dynamic) and adjust image settings (e.g. brightness, saturation and contrast).
Press **Done** to save changes. For further information, refer to "Rear view camera" in the Owner's Manual.

- **+** (pop-up menu):
  
  Press **+** in the **Park Assist** menu or submenus followed by **Reset to the default values** to restore default factory settings for all or current Park Assist options.

- **Image settings** (available depending on version)
  
  To adjust e.g., brightness, saturation and contrast.

- The following options (depending on vehicle) can also be adjusted:
  - Automatically fold in the exterior mirrors to the parking position upon locking the vehicle (switch on/off)
  - Lock/unlock doors while driving
  - Activate rear window wiper when selecting reverse gear (switch on/off)
  - Daytime running lights (switch on/off)
  - Unlock the driver's door only when opening the door (switch on/off)
  - Easy access (switch on/off)
  - Driving style indicator (fuel economy gauge) (switch on/off)
  - Eco score (switch on/off)
  - Show report after trip (switch on/off)

After the settings are changed, press **Done** to confirm.

**Services (NAVI 80 IntelliLink)**

To access the Services menu from the Home page, press **MENU** followed by **Services** on the display screen.

The following menus are displayed:

- **Navigation services**
- **Settings**

**Navigation services**

In addition to the free navigation services (e.g. traffic information, fixed speed cameras), extra features can be added by subscribing to paid LIVE services.

Refer to (NAVI 80 IntelliLink) "LIVE services" in the "Navigation" section 378.

**Settings**

The following menus are displayed:

- **Connectivity manager**
  
  Select to manage Bluetooth auxiliary devices.

- **Navigation services**
  
  Select to access navigation related features, e.g. traffic, speed cameras, local search, My TomTom LIVE, weather.

  Refer to (NAVI 80 IntelliLink) "LIVE services" in the "Navigation" section 378.

**Note**

A compatible SD card must be inserted to access LIVE services.
Introduction

- **Data sharing settings**
  Select to switch data sharing on/off.

  **Note**
  When data sharing is switched off, certain features may not operate correctly.

- **Turn Bluetooth on/off (or Activate/deactivate Bluetooth)**
  Select to switch Bluetooth on/off. A confirmation message is displayed.

**Favourites (NAVI 80 IntelliLink)**
When the Home page is displayed, press ★ to view, add or delete favourites for the following features:

- ✆ Navigation 75.
- 🎁 Multimedia - refer to "Radio" 48.
- ☎ Phone 108.
- 🌯/⊕ Services 78.

**Navigation favourites**
Select an empty slot in the display or press + (to open a pop-up menu), then select Add Favourite.

Choose from the displayed list to add a saved destination to the favourites.

For further information, refer to (NAVI 80 IntelliLink) "Destination input" in the "Navigation" section 90.

**Multimedia favourites**
Select an empty slot in the display or press + (to open a pop-up menu), then Add Favourite.

Choose from the displayed list to add a preset FM radio station to the favourites.

**Phone favourites**
Select an empty slot in the display or press + (to open a pop-up menu), then Add Favourite.

Choose from the displayed list to add a phone contact to the favourites.

For further information, refer to (NAVI 80 IntelliLink) "Phonebook" in the "Phone" section 116.

**Services favourites**
Select an empty slot in the display or press + (to open a pop-up menu), then Add Favourite.

Choose from the displayed list to add a service item to the favourites.

**Delete favourites**
Press + and select Remove all Favourites or Remove a Favourite.
Then select a favourite from the displayed list. A confirmation message is displayed. Press Delete and confirm if prompted.

**Additional features (NAVI 50 IntelliLink)**
Depending on version, the following additional features are available:

- Rear camera view settings
- Driving eco2 function (driving economy)
- AhaⓇ application (for smartphones)

**Rear camera view settings**
When the rear camera view is shown on the display, press ⌥ Setting to open the settings menu.
The following settings can be updated:

- **Switch the rear camera view display Off/On.**
- **Colours**
  Press ←/→ to adjust level.
- **Brightness**
  Press ←/→ to adjust level.
- **Contrast**
  Press ←/→ to adjust level.

For further information, refer to "Rear view camera" section in the vehicle Owner's Manual.

**Driving eco2 function (driving economy)**
Driving eco2 provides statistical information and advice regarding driving economy.

From the Home page, press **Vehicle** then select Driving eco2 on the display screen.

**Note**
Depending on version, Driving eco2 may appear instead on the Home page.

The following menus are displayed:

- **Trip report**
- **Eco scoring**
- **Eco coaching**

**Trip report** displays data from the last journey, including "Average consumption", "Total consumption", "Average Speed" and "Dist. without consumption". Data can be reset by pressing 🔄.

**Eco scoring** provides an overall score out of 100 for driving economy. Higher figures indicate better driving economy. Star ratings are also given for average environmental driving performance (Acceleration), gearchanging efficiency (Gearbox) and brake control (Anticipation).

**Eco coaching** provides an assessment of your driving style and displays advice for optimising fuel consumption.

**Aha® application**
The Aha® app enables you to organise favourite smartphone internet content (e.g. podcasts, audio books, internet radio, social network sites etc.) and access favourites instantly. Aha® can also be used during navigation, to suggest e.g. hotels and restaurants in the vicinity, and provide weather information and current GPS position.

Aha® must first be downloaded onto your smartphone. Launch the app on your smartphone and create a user account to enable use via the Infotainment system.

To connect to Aha® via the Infotainment system, a bluetooth connection must be set up between the smartphone and the Infotainment system, i.e. the device must be paired to the vehicle before using it. Refer to "Bluetooth connection" in the "Phone" section 112 for further information.

**Note**
Data sharing and location services must be enabled on the smartphone to use the Aha® app. During use, data transfer may incur additional costs not included in the contract with your network provider.

When a bluetooth connection is active, Aha® can be accessed via the Infotainment system. From the Home page, press Media on the
Introduction

display screen. Press ▼ in top left corner to display the list of auxiliary sources, then select aha.
The following menus are displayed:
● Player
● List
● Presets
● Nearby

To access your Aha® favourites, select Presets.

While using the navigation system 75, to find a nearby point of interest (POI) with Aha® press Nearby and select a group (e.g. hotel, restaurant). A range of POIs in the vicinity are displayed; press on the required POI. The POI can be set as either a destination or a waypoint by pressing  

Depending on POI type, contact details and further information may be displayed. When phone numbers are provided for POIs, they can also be dialled using the handsfree phone system by pressing  

For further information, refer to "Operation" in the "Phone" section 116.

Tone settings

R15 BT USB - Tone settings

In the audio settings menu, the tone characteristics can be set.

Press SETUP to access the settings menu.

Select Audio settings and turn OK until the desired setting is selected from:
● BASS (bass)
● TREBLE (treble)
● FADER (front/rear balance)
● BALANCE (left/right balance)

The display indicates the type of setting followed by the adjustment value.

Set the desired value by turning OK and press the knob to confirm selections.

To exit the audio settings menu, press  

Note
If there is no activity, the system will exit the audio settings menu automatically.

Setting bass and treble

Select Bass or Treble.

Set the desired value by turning OK and press the knob to confirm setting.

Setting the volume distribution between right - left

Select Balance.

Set the desired value by turning OK and press the knob to confirm setting.

Setting the volume distribution between front - rear

Select Fader.

Set the desired value by turning OK and press the knob to confirm setting.

NAVI 50 IntelliLink - Tone settings

To access the settings menu at any time, press # followed by Settings on the display screen.
The following settings submenus are displayed:

- **Audio**
  See "Audio settings" below.

- **Display**
  Refer to (NAVI 50 IntelliLink) "System settings" 42.

- **Bluetooth**
  Refer to (NAVI 50 IntelliLink) "System settings" 42.

- **System**
  Refer to (NAVI 50 IntelliLink) "System settings" 42.

**Audio settings**
Select Audio to display the following options:

- **Vol/Speed** (Off/1/2/3/4/5)
  Speed dependent volume control - refer to (NAVI 50 IntelliLink) "Volume settings" 41.

- **Loudness** (On/Off)
  Switch loudness on to increase bass and treble levels.

- **BAL/FAD**
  Available depending on version. Press ▶ to open the volume distribution balance and tone settings submenu.
  On the left side of the display, adjust the right/left balance with ◀/▶ and the front/rear balance with ▲/▼.
  On the right side of the display, adjust the **Bass**, **Mid** and **Treble** tone characteristics (between -5 to +5) with ◀/▶.
  Press OK to confirm changes.

- **Sound**
  Depending on version, press ▶ to open the volume distribution balance and tone settings submenu.
  On the left side of the display, adjust the right/left balance with ◀/▶ and the front/rear balance with ▲/▼.
  On the right side of the display, adjust the **Bass**, **Mid** and **Treble** tone characteristics (between -5 to +5) with ◀/▶.
  Press OK to confirm changes.

For other versions of the sound submenu (where volumes can be set individually for a list of audio types), refer to (NAVI 50 IntelliLink) "Volume settings" 41.

**NAVII 80 IntelliLink - Tone settings**
Refer to (NAVI 80 IntelliLink) "System settings" 42.

**Volume settings**

**NAVII 50 IntelliLink - Volume settings**
To access the settings menu at any time, press 7 followed by ◆Settings on the display screen.

The following settings submenus are displayed:

- **Audio**
  See "Audio settings" below.

- **Display**
  Refer to (NAVI 50 IntelliLink) "System settings" 42.
Introduction

- Bluetooth
  Refer to (NAVI 50 IntelliLink) "System settings" \(\Rightarrow\) 42.

- System
  Refer to (NAVI 50 IntelliLink) "System settings" \(\Rightarrow\) 42.

Audio settings
Select Audio to display the following options:

- **Vol/Speed** (Off/1/2/3/4/5)
  The volume increases when vehicle speed increases, to compensate for wind and road noise.
  Speed compensated volume can be switched off or the degree of volume adaptation can be set.

- **Loudness** (On/Off)
  Switch loudness on to increase bass and treble levels.

- **BAL/FAD**
  Refer to (NAVI 50 IntelliLink) "Tone settings" \(\Rightarrow\) 40.

- **Sound**
  Press \(\uparrow\) to open the audio preferences submenu.

Depending on version, the volume of different audio types can be set independently, e.g. audio, traffic announcements, navigation instructions, handsfree phone system and ringtone levels. Press \(-/\uparrow\) to adjust volume of each audio type.

If required, press **Reset to defaults** to return all volumes to the factory settings.

For other versions of the sound submenu, refer to (NAVI 50 IntelliLink) "Tone settings" \(\Rightarrow\) 40.

**NAVI 80 IntelliLink - Volume settings**
Refer to (NAVI 80 IntelliLink) "System settings" \(\Rightarrow\) 42.

System settings

**R15 BT USB, R16 BT USB, CD16 BT USB, CD18 BT USB - System settings**
Press SETUP and access the settings menu by turning and pressing OK.

When system setting adjustments have been made, press SETUP to exit the menu and save changes. The system also saves and exits automatically after a delay.

**Change system language**
Change the display language by accessing the Language menu. Select a language from the list by turning and pressing OK.

**Restore default system settings**
To restore system settings to their default values, select Default settings by turning and pressing OK. Confirm modification when prompted by pressing OK again.
NAV 50 IntelliLink - System settings

To access the settings menu at any time, press 🏡 followed by ✉ Settings on the display screen.

The following settings submenus are displayed:

- **Audio:**
  Refer to (NAV 50 IntelliLink) "Tone settings" 40 and "Volume settings" 41.
- **Display:** See below.
- **Bluetooth:** See below.
- **System:** See below.

### Display
Select **Display** to display the following options:

- **Brightness** (Low/Mid/High)
- **Map mode** (Auto/Day/Night)
  - **Auto:** Day and night mode are changed automatically.
  - **Day:** The map screen is always displayed with bright colours.
  - **Night:** The map screen is always displayed with dark colours.
- **AC Info** (On/Off)
  Available depending on version. Switch on/off the display of air conditioning information during adjustment of settings (available depending on vehicle).
- **Background** (Dark/Light)
  Available depending on version. Switch between a dark or light display mode (available depending on vehicle).

### Bluetooth
Select **Bluetooth** to display the following options:

- **View Bluetooth device list**
- **Search for Bluetooth device**
- **External device authorisation**
- **Change passkey** (for pairing of Bluetooth devices with the Infotainment system)
- **Smartphone**
  Available depending on version. For help with activating and operating voice controls - refer to "Voice recognition" 105.

For further information on Bluetooth settings, refer to (NAV 50 IntelliLink) "Bluetooth music" 67 and "Bluetooth connection" in the "Phone" section 112.

### System
Select **System** to display the following options:

- **Language**
  Change display language and voice instruction language for Navigation system. Press OK to confirm selection.
Introduction

- Clock/units
  The following settings can be changed:
  - Time Format (12h/24h)
  - Units (km/mls)
  - Time Setting
    Press ▶ to open the Time set submenu containing the following options:
    **Auto/Manual**
    If Auto time setting is selected, the time is set automatically by GPS.
    If Manual time setting is selected, adjust as appropriate.

- Factory settings
  The following settings can be reset to the factory default:
  - All
  - Phone

- Navigation
- Audio-Media-Radio-System
- Navigation (On/Off)
- System version (displays Infotainment system software version number)

When system setting adjustments have been made, press ⏯ (and select another menu on the display) to exit the settings menu and save changes. The system also saves and exits automatically after a delay.

**NAVI 80 IntelliLink - System settings**

To access the system settings menu from the Home page, press MENU followed by System on the display screen.

The following settings submenus are displayed:
- Language
- Display
- Sound
- Clock
- Safety warnings

- Home screen
- Keyboards
- Set units
- Status & Information
- Remove SD-card
- Restore factory settings

After system settings are changed, press Done to confirm.

**Language**
To change Infotainment system language then voice type (depending on version).

**Display**
The following settings are displayed:
- **Daytime brightness**: Change screen brightness to suit external light levels (daylight).
  During low external light levels, the display screen is easier to view when the display is not too bright.
- **Nighttime brightness/Night brightness**: Change screen brightness to suit external light levels (night light).
During low external light levels, the display screen is easier to view when the display is not too bright.

- **Automatic day/night mode/Switch to night mode at night**: To activate automatic switching between daytime/night brightness.
  
  Night mode is activated during low external light levels and when the headlights are switched on.

- **Force night mode/Use night mode**: To activate night mode.

### Sound

The following settings submenus are displayed:

- **Sound levels**: To change volume and sounds for traffic information, handsfree phone system, phone ringtone, system/computer voice, navigation instructions and park assist (depending on version).
- **Alerts**: To adjust alert volume, and switch on/off alerts when display screen is switched off.

### Speed sensitivity

To set volume adjustment based on vehicle speed.

### Computer voice

Adjust types of information to be given by the Infotainment system voice (e.g. "Read aloud motorway lane instructions").

### Voice

Change the voice used by the Infotainment system (if available).

### Clock

To set the system clock and the time display format.

Keeping the automatic time adjustment setting switched on is recommended.

### Safety warnings

To switch on/off various alerts provided by the Infotainment system (e.g. "Warn when driving faster than allowed"). Check appropriate boxes to switch on.

### Home screen

To change the home page configuration.

Select from list of options to see a preview of each home page layout.

### Keyboards

To change first the alphabet type (e.g. Latin, Greek) then the keyboard type (e.g. Qwerty, ABCD).

### Set units

To change the units of measurement, for e.g. distance (km/miles), coordinates (degrees, minutes, seconds), temperature (°C, °F) and barometric units (if available).

### Status & Information

To display system information, e.g. version, GPS status, network status, licences and copyright information.

### Remove SD-card

To eject the SD card safely.

### Restore factory settings

To delete all Infotainment system information. Follow the instructions on the display.

### Note

Afterwards, the Infotainment system will restart in English by default. If necessary, select **Language** in the **System** menu to change language.
Introduction

Multimedia settings
To access the Multimedia settings menu from the Home page, press MENU then Multimedia, followed by Settings on the display screen.
The following settings submenus are displayed:

- Sound
- Radio
- Media
- Pictures
- Video

After settings have been changed, press Done to confirm.

Sound
The following sound settings can be updated:
- 'Spatialisation':
  Set the sound distribution in the vehicle.
- 'Bass Treble'/'Ambience':
  Set the sound option, e.g. 'Neutral' or 'Pop-rock', 'Classical', 'Jazz' (if available). Select 'Manual' to manually set the treble and bass levels.

Press Done to save changes.
- 'Demo arkamys' (if available):
  Select to trial Arkamys mode.
- 'Bass Boost Arkamys':
  Switch bass amplification on/off.

Radio
The following radio settings can be updated:
- switch searching for Alternative Frequencies (AF) on/off
- switch i-traffic (Traffic program information) on/off
- switch programme type (PtY) on/off
- switch Simulcast on/off
- display i-announcement information (e.g. Area weather information, Event information)
- update list of saved radio stations

For further information, refer to (NAVI 80 IntelliLink) "Radio" 48.

Media
The following media settings can be updated:
- Repeat (a track): Switch on/off
- Shuffle: Switch on/off
- Display album cover: Switch on/off
- Manage Bluetooth devices: Configure

For further information, refer to (NAVI 80 IntelliLink) "Bluetooth music" 67.

Pictures
The following photo settings can be updated:
- set display time for photos during a slideshow ("Slide show delay")
- set transition effects between photos in a slideshow ("Slide show transition")
- switch from normal to full screen display ("Default view")

For further information, refer to "Displaying pictures" 73.
**Video**
The following video settings can be updated:

- set display type for videos (if available)
- switch from normal to full screen display

For further information, refer to "Playing movies" 73.
Radio

Usage .......................................... 48
Station search .............................. 50
Autostore lists .............................. 52
Radio data system (RDS) ............ 53
Digital audio broadcasting .......... 55

**Usage**

**Radio reception**

Radio reception may be disrupted by static, noise, distortion or loss of reception due to:
- changes in distance from the transmitter
- multi-path reception due to reflection
- shadowing

**R15 BT USB, R16 BT USB, CD16 BT USB, CD18 BT USB - Controls**

The most important buttons for control of the radio are:
- **RADIO**: Activate radio, change waveband
- **来回**: Station search
- **OK**: Change frequency
- **Station buttons 1...6**: Preset station buttons

- **SETUP**: System settings, automatic station storing
- **TEXT**: Display radio text information

**Activating the radio**

Press **RADIO** to switch the audio source to radio.

The station previously selected will be received.

**Selecting the waveband**

Press **RADIO** repeatedly to switch between the available wavebands (e.g. FM1, FM2, AM).

The station previously selected in that waveband will be received.

**NAVI 50 IntelliLink - Controls**

Use the touchscreen to operate the radio.
The main controls are:
- **FM/AM/DAB (depending on version):** Press ▼ and switch between FM and AM wavebands.
- **◄►/★★**: Press to start automatic search for next/previous radio station.
- **◄/►**: Press to change to next/previous frequency in increments of 0.5.

**Activating the radio**
To activate the radio at any time, press ⬤ followed by Radio on the display screen. The station previously selected will be received.

The following submenus are displayed:
- **Main:** Radio station/frequency is displayed.
- **List:** Displays an alphabetical list of available radio stations (maximum 50 stations).

**Note**
Radio stations without RDS: Only the frequency is displayed. These stations appear at the end of the list.

- **Preset:** Displays stored favourite radio stations.
- **Options:**
  The following settings can be changed, depending on selected waveband:
  - **RDS (On/Off)**
  - **TA (On/Off)**
  - **Region (On/Off)**
  - **News (On/Off)**
  - **AM (On/Off)**
  - **Update list (On/Off)**

For further information, refer to (NAVI 50 IntelliLink) "Radio data system (RDS)" 53.

**Selecting the waveband**
Press ▼ alongside FM/AM/DAB (if available) in the top left corner of the display and select FM, AM or DAB waveband.

The station previously selected in that waveband will be received.

**Note**
AM waveband can be switched off via the Options menu.

Refer to "Digital audio broadcasting" 55.

**NAVI 80 IntelliLink - Controls**
Use the touchscreen to operate the radio.

The main controls are:
- **FM/AM/DR:** Press tab in top left corner of the display and switch between FM, AM and DR (digital radio) wavebands.
- **◄►/★★**: Press to start automatic search for next/previous radio station.
- **◄/►**: Press to change to next/previous frequency in increments.
- **habit/★**: Press to scroll through a list of stations.

**Activating the radio**
To access the Radio from the Home page, press MENU then Multimedia, followed by Radio on the display screen.
The following modes are available:
- **Preset:**
  Displays stored favourite radio stations.
- **List:**
  Displays an alphabetical list of available radio stations (maximum 50 stations).

**Note**
Radio stations without RDS: Only the frequency is displayed. These stations appear at the end of the list.

- **Frequency:**
  Search manually or automatically by scanning the selected range of frequencies.

**Station search**

**Automatic station search**

**R15 BT USB, R16 BT USB, CD16 BT USB, CD18 BT USB - Automatic station search**

Briefly press \[\text{[} \text{[} \text{ or } \text{]} \text{]}\] to search for the next receivable station in the current waveband.

If no station is found, automatic searching continues until \[\text{[} \text{[} \text{ or } \text{]} \text{]}\] is pressed again.

**NAVI 50 IntelliLink - Automatic station search**

Press \[\text{[} \text{[} \text{ or } \text{]} \text{]}\] in the display to search for the next receivable station in the current waveband.

If no station is found, automatic searching continues until \[\text{[} \text{[} \text{ or } \text{]} \text{]}\] is pressed again.

**NAVI 80 IntelliLink - Automatic station search**

Press \[\text{[} \text{[} \text{ or } \text{]} \text{]}\] in the display to search for the next receivable station in the current waveband.

If no station is found, automatic searching continues until \[\text{[} \text{[} \text{ or } \text{]} \text{]}\] is pressed again.

**Manual station search**

**R15 BT USB, R16 BT USB, CD16 BT USB, CD18 BT USB - Manual station search**

Select the desired waveband then press and hold \[\text{[} \text{[} \text{ or } \text{]} \text{]}\] to scan the selected waveband.

Release the button when close to the required frequency. An automatic search is then made for the next receivable station and it is played automatically.

Turn OK to change the frequency in increments.

**Stored station search**

This allows you to recall radio stations that you have previously stored.

To store a station, select the desired waveband and station then press station button 1...6 until an audible signal sounds, confirming that the station has been stored to the appropriate station button. 6 stations per waveband can be stored.
Recalling a stored station
To recall a station, select the desired waveband then briefly press station button 1...6.

Search radio station name (FM only)
Select the FM waveband then highlight the station name in the display using ◄ or ►.
Press ▼ or ▲ repeatedly to manually search for the required station name. The frequency may be displayed instead if the station name is unavailable.

The alphabetical list contains up to 60 FM radio stations with the best reception. This list can be updated at any time. Autostore lists 52.

NAVI 50 IntelliLink - Manual station search
Select the desired waveband then press ◄ or ► to change to next/previous frequency in increments of 0.5.

Stored station search
This allows you to recall radio stations that you have previously stored.

To store a station, select the desired waveband and station then press Preset to display the stored favourites.
Press and hold on the desired location. The frequency or name of the radio station appears on the favourite location, confirming that the station has been stored (► indicates the currently received station).

Note
12 stations per waveband can be stored.

Recalling a stored station
To recall a station, select the desired waveband then press Preset to display the stored favourites. Briefly press the desired favourite radio station.
Press ◄/► to move to the previous/next page of favourites.

Search radio station name (FM and DAB only)
Select waveband FM or DAB (if available) then press List to display an alphabetical list of available radio stations.

Press ▼ or ▲ to manually search for the required station name. The frequency may be displayed instead if the station name is unavailable. Press a list item to receive the selected station (► indicates the currently received station).
The alphabetical list contains up to 50 radio stations with the best reception. This list can be updated at any time, refer to "Autostore lists" 52.

NAVI 80 IntelliLink - Manual station search
Select the desired waveband then press ◄ or ► to change to next/previous frequency in increments.

Stored station search
This allows you to recall radio stations that you have previously stored.
To store a station, select the desired waveband and station then press Preset to display the stored favourites.
Press and hold on the desired location until a beep is heard. The frequency or name of the radio station appears on the favourite location,
confirming that the station has been stored. 6 stations per waveband can be stored.

Alternatively, select the desired waveband and station then press Frequency or List. Press + to open a pop-up menu, then select Save as preset. Press and hold on the desired location until a beep is heard.

Recalling a stored station
To recall a station, select the desired waveband then press Preset to display the stored favourites. Briefly press the desired favourite radio station.

Search radio station name (FM only)
Select the FM waveband then press List to display an alphabetical list of available radio stations.

Press ↑/↓ or ←/→ to manually search for the required station name. The frequency may be displayed instead if the station name is unavailable.

The alphabetical list contains up to 50 radio stations with the best reception. This list can be updated at any time, refer to "Autostore lists" 52.

Autostore lists
The stations with the best reception in a waveband can be searched for and stored automatically via the autostore function.

Automatic station storing
R15 BT USB, R16 BT USB, CD16 BT USB, CD18 BT USB - Automatic station storing
The FM waveband has an autostore list (AST), on which 6 stations can be stored.

While listening to the radio, press and hold RADIO: The 6 stations with the strongest reception will be automatically stored on AST.

Note
Due to signal strength, it is possible that less than 6 stations will be stored.

Recalling a station
R15 BT USB, R16 BT USB, CD16 BT USB, CD18 BT USB - Recalling a station
Select the desired waveband, then briefly press station button 1...6 to recall a stored station.

To recall a station on the autostore list (AST), while listening to the radio briefly press SETUP to activate AST mode. The station previously selected will be received. Briefly press station button 1...6 to recall another stored station on the autostore list.

Updating stations list manually
Stations can also be stored manually in the autostore list.

Note
Only available with NAVI 50 IntelliLink, NAVI 80 IntelliLink.

To update the list of stations and obtain the most recent ones, activate the system update manually.
Depending on Infotainment system, the sound may be muted during a manual update.

**NAVI 50 IntelliLink - Updating stations list manually**

Press **Options**, scroll down to **Update List** then select **Start**; **Updating ...** appears on the display until the update is complete.

**Note**

If DAB is available, it is recommended to update the DAB stations list manually when the system is switched on.

**NAVI 80 IntelliLink - Updating stations list manually**

From the Home page, press **MENU** then **Multimedia**, followed by **Settings** on the display screen. Select **Radio** and scroll down to **Update radio list**.

Alternatively (depending on version), select **Multimedia** followed by **Radio**, and choose any of the following modes:

- **Preset**
- **List**
- **Frequency**

Then press **+** to open a pop-up menu, and select **Update radio list**.

**Radio data system (RDS)**

RDS is an FM station service that helps you find the desired station and ensures its fault-free reception.

**Advantages of RDS**

- The programme name of the chosen station appears on the display screen instead of its frequency.
- During an automatic station search, the Infotainment system tunes into RDS stations only.
- The Infotainment system always tunes into the best receivable broadcasting frequency of the chosen station, by means of AF (Alternative Frequency).

**R15 BT USB, R16 BT USB, CD16 BT USB, CD18 BT USB - RDS functions**

**Configuring RDS**

Press **SETUP** and turn **OK** to access the **RDS** menu. Press knob to select. Turn the rotary knob to select **RDS SETUP**.

**Switching RDS on and off**

Press **Options** on the display screen. The following settings can be changed:

Switch on/off **RDS-AF** by pressing **OK**. **AF** is shown on the display screen when RDS is active.

**Text information (Radio text)**

Certain FM radio stations issue text information relating to the broadcast program (e.g. song name).

Press **SETUP** and turn **OK** to access the **Radio texts** menu.

Turn the rotary knob to select **Radio** and press the knob to see this information.
NAVI 50 IntelliLink - RDS functions

Configuring RDS

Press Options on the display screen. The following settings can be changed:

- **RDS (On/Off)**
  Switch off if not required.
- **TA (On/Off)**
  See below.
- **Region/AF (On/Off)**
  See below.
- **News (On/Off)**
  See below.
- **AM (On/Off)**
  Switch off if not required.
- **Update list (On/Off)**
  Refer to (NAVI 50 IntelliLink) "Autostore lists" 52.

**TA (Traffic announcements)**

If TA is switched on:
- Traffic announcements from certain FM radio stations (and DAB stations, if available) are broadcast automatically.
- Radio and auxiliary audio source playback is interrupted for the duration of the traffic announcement.

**Note**

Automatic broadcasting of traffic announcements is deactivated if waveband is set to AM.

**Region/AF**

If the RDS function is activated and Region/AF is switched on:

The frequency of certain FM radio stations may change depending on the geographical area.

Poor reception can sometimes cause erratic and unwelcome changes in frequency. Switch off Region/AF if necessary.

**News**

If News is switched on:
- News announcements from certain FM radio stations (and DAB stations, if available) are broadcast automatically.
- Radio and auxiliary audio source playback is interrupted for the duration of the traffic announcement.

**Text information (Radio text)**

Certain FM radio stations (and DAB stations, if available) issue text information relating to the broadcast program (e.g. song name).

NAVI 80 IntelliLink - RDS functions

Configuring RDS

To access the Radio settings menu from the Home page, press MENU then Multimedia, followed by Settings then Radio on the display screen.

Depending on version, press † to open a pop-up menu, and access the 'Radio settings' option.
The following radio settings can be updated:

- switch searching for Alternative Frequencies (AF) on/off
- switch i-traffic (Traffic program information) on/off
- switch programme type (PtY) on/off
- switch Simulcast on/off
- display i-announcement information (e.g. Area weather information, Event information)
- update list of saved radio stations

Alternative Frequency (AF)
Switch on the RDS-AF function to always tune into the best receivable broadcasting frequency of the chosen station.

Poor reception can sometimes cause erratic and unwelcome changes in frequency. Switch off RDS-AF function if necessary.

i-traffic (Traffic program information)
Radio traffic service stations are FM RDS stations that broadcast traffic news.

Switch on I-Traffic to automatically receive traffic bulletins when they are broadcast.

Programme type search (PtY)
Switch on PtY to display the type of programme (e.g. news, sport) currently being broadcast.

Update radio list
Refer to (NAVI 80 IntelliLink) "Autostore lists" 52.

Simulcast
Switch on the Simulcast function to automatically change from a DR (digital radio) station to the same station on the FM waveband in the event of a loss of reception.

i-announcement
Select to display information such as weather or events in the vicinity.

Text information (Radio text)
Certain FM radio stations issue text information relating to the broadcast program (e.g. song name).
To check for text information, from any radio mode (e.g. Preset, List, Frequency) press + to open a pop-up menu, and access the text information option, by selecting e.g. "Show radio text".

Digital audio broadcasting
Digital audio broadcasting (DAB) is an innovative and universal broadcast system.

General information

- DAB stations are indicated by the programme name instead of the broadcasting frequency.
- With DAB, several radio programmes (services) can be broadcast on a single frequency (ensemble).
- Besides high-quality digital audio services, DAB is also able to transmit programme-associated data and a multitude of other data services including travel and traffic information.
- As long as a given DAB receiver can pick up the signal sent out by a broadcasting station (even if the signal is very weak), sound reproduction is ensured.
There is no fading (weakening of the sound) that is typical of AM or FM reception. The DAB signal is reproduced at a constant volume.

Interference caused by stations that are on nearby frequencies (a phenomenon that is typical of AM and FM reception) does not occur with DAB.

If the DAB signal is too weak to be picked up by the receiver, the system switches over to the same programme on another DAB or FM station.

If the DAB signal is reflected by natural obstacles or buildings, the reception quality of DAB is improved, whereas AM or FM reception is considerably impaired in such cases.

When DAB reception is enabled, the FM tuner of the Infotainment system remains active in the background and continually searches for the best receivable FM stations.
General information
The Infotainment system's CD player can playback audio CDs, MP3 CDs and also WMA CDs (depending on version).
CD16 BT, CD18 BT: AAC and WAV formats can also be played.

Important information about audio CDs and MP3/WMA CDs

Caution
Under no circumstances place DVDs, single-CDs with a diameter of 8 cm or shaped CDs in the audio player.
You must not put any stickers on CDs. These discs can get jammed in the CD drive and ruin the drive. An expensive replacement of the device will then be necessary.

- Audio CDs with copy protection, which are not in compliance with the audio CD standard, may not play correctly or not at all.
- Self-recorded CD-Rs and CD-RWs and WMA files with Digital Rights Management (DRM) from online music shops may not play correctly or not at all.
- On mixed mode CDs (combinations of audio and data, e.g. MP3), only the audio tracks will be detected and played.
- Self-recorded CD-Rs and CD-RWs are more vulnerable to mishandling than prerecorded CDs. Correct handling, especially in the case of self-recorded CD-Rs and CD-RWs, must be ensured; see below.
- Avoid leaving fingerprints when you change CDs.
- Put CDs back in their sleeves immediately after removing them from the CD player, in order to protect them from dirt and damage.
- Dirt and liquids on CDs can smear the lens of the audio player inside the device and cause faults.
• Protect CDs from heat and direct sunlight.
• The following restrictions apply for MP3/WMA CDs:
  Only MP3 files and WMA files can be read.
  Maximum folder structure depth: 11 levels
  Maximum number of MP3 and/or WMA files that can be saved: 1000 files
  Applicable playlist extensions: .m3u, .pls
  Playlist entries must be in the form of relative paths.
• The operation of MP3 and WMA files is identical. When a CD with WMA files is loaded, MP3-related menus are displayed.

Usage

CD Player

Starting CD playback
Switch on the Infotainment system (by pressing \(\text{\textcopyright}\) ) and push the CD with the printed side up into the CD slot until it is pulled in: CD playback starts automatically.
If there is already a CD in the unit, press MEDIA repeatedly to select the desired audio source: CD playback is started.

Note
Depending on the data stored on the audio CD or MP3 CD, differing information about the CD and the current music track will be shown on the display.

Selecting an album or track
Turn BROWSE to select an album or track from the list.
Press the knob to select.

Skipping to the next track or previous track
Briefly press \(\text{\textleft\textup{arrow}}\) or \(\text{\textright\textup{arrow}}\) once or several times.

Fast forward or rewind
Press and hold \(\text{\textleft\textup{arrow}}\) or \(\text{\textright\textup{arrow}}\) to fast forward or rewind the current track.

Repeat
During CD playback, press and hold the numbered button 1 (from the Station buttons 1...6) to repeat the current track.
RPT appears on the display when repeat is active.
Press and hold the numbered button 1 again to deactivate.
RPT disappears from the display.

Random playback
During CD playback, press and hold the numbered button 2 (from the Station buttons 1...6) to activate random playback.
MIX appears on the display when random playback is active.
Note
On an MP3 CD, the random playback function applies only to the current album.

Press and hold the numbered button 2 again to deactivate.
MIX disappears from the display.
Random playback can also be deactivated by ejecting the CD.

Note
Random playback is not deactivated when the audio system is switched off or the source changed.

Pause
Briefly press ◆, ◇ or both ◇ and ◆ simultaneously to interrupt CD/MP3 CD playback. Press again to resume playback.
The pause function is deactivated automatically when the volume is adjusted, the audio source is changed or automatic information messages are issued.

Displaying additional text information (CD-Text or ID3 tag)
After selecting a track or album, briefly press TEXT to access the text information available on the CD (e.g. artist name, album name or song name).
To display all text information at once, press and hold numbered button TEXT.
To exit the display, press ➹➢.

Removing a CD
Press △: The CD is pushed out of the CD slot.
If the CD is not removed after ejection, it will be drawn back in again automatically after a few seconds.

NAVI 80 IntelliLink (Type B and C) - CD player usage

Starting CD playback
Switch on the Infotainment system (by pressing ◆) and push the CD with the printed side up into the CD slot until it is pulled in: CD playback starts automatically.

If there is already a CD in the unit, press MEDIA or AUDIO repeatedly to select the desired audio source: CD playback is started.

Note
Depending on the data stored on the audio CD or MP3 CD, differing information about the CD and the current music track will be shown on the display.

Selecting an album or track
Press New selection or Current playlist on the display screen, or turn the central rotary knob to select an album or track from the list.

Skipping to the next track or previous track
Briefly press ◄◄ or ►► once or several times.

Fast forward or rewind
Press and hold ◄◄ or ►► to fast forward or rewind the current track.
Random playback
Press + on the display screen, or press Options on the central control unit to access the settings menu, then select Shuffle to activate.

Note
On a CD MP3/WMA, the random playback function applies to the current album, then moves on to the next album.

Pause
Briefly press II on the display screen, or press the volume rotary knob, * or both \(\triangleright\) and \(\triangleright\) simultaneously to interrupt CD/MP3 CD playback. Press again to resume playback.

The pause function is deactivated automatically when the volume is adjusted, the audio source is changed or automatic information messages are issued.

Displaying additional text information (CD-Text or ID3 tag)
After selecting a track or album, press and hold the central rotary knob to access the text information available on the CD (e.g. artist name, album name or song name).

To exit the display, press \(\Rightarrow\).

Removing a CD
Press + on the display screen and then select Eject, or press \(\Delta\): The CD is pushed out of the CD slot.

If the CD is not removed after ejection, it will be drawn back in again automatically after a few seconds.
AUX input

An AUX socket is available for the connection of external audio sources.

**Note**
The socket must always be kept clean and dry.

It is possible, for example, to connect a portable CD player with a 3.5 mm jack plug to the AUX input.

**Usage**
An audio source that is connected to the AUX input can only be operated via the controls on the audio source, i.e. not via the Infotainment system.

**Caution**
Before connecting or disconnecting an auxiliary device, e.g. a portable CD player, switch off the player and the Infotainment system, to avoid sound quality issues and possible damage to the equipment.

Upon connection via the jack plug, the system detects the audio source automatically. Depending on the recording volume, there may be a delay before the audio source is heard.

The artist or track name are not shown on the display screen.

**Note**
Ensure the auxiliary device is securely stowed during driving. Vehicle occupants could be injured by objects being thrown around in the event of hard braking, a sudden change in direction or an accident.
R15 BT USB, R16 BT USB, CD16 BT USB, CD18 BT USB-AUX input usage
Press MEDIA or AUDIO/SOURCE to change the audio source to AUX mode, then switch on the auxiliary device. AUX appears on the display screen.

AUX settings
Press SETUP to access the settings menu.
Select AUX IN and turn OK until the desired setting is selected from:
- HI (300 mV)
- MID (600 mV)
- LO (1200 mV)

NAVI 50 IntelliLink - AUX input usage
To access the media menu at any time, press 🎮 followed by 🎧 MEDIA on the display screen.

To switch between auxiliary sources, press ▼ in top left corner. The following options are available:
- USB: Refer to (NAVI 50 IntelliLink) "USB port" 63.
- iPod: Refer to (NAVI 50 IntelliLink) "USB port" 63.
- BT: Refer to (NAVI 50 IntelliLink) "Bluetooth music" 67.
- Aha: AhaⓇ application for smartphones (available depending on version).
  Refer to "Usage", Additional features (NAVI 50 IntelliLink) in the "Introduction" section 30.
- AUX: Select to change the audio source to AUX mode, then switch on the auxiliary device.

NAVI 80 IntelliLink - AUX input usage
Change the audio source to AUX mode to playback content from a connected auxiliary device.

To access the media menu from the Home page, press MENU then Multimedia, followed by Media on the display screen.
Press ‡ to open a pop-up menu (depending on version). The following options are available:
- Auxiliary socket: Change the audio source to AUX mode, then switch on the auxiliary device.
- USB: Refer to (NAVI 80 IntelliLink) "USB port" 63.
- Bluetooth connection: Refer to (NAVI 80 IntelliLink) "Bluetooth music" 67.
- CD player: Refer to (NAVI 80 IntelliLink) "CD player usage" 67.
- SD card: Operation is similar to those for the CD player 58.
In the Infotainment unit (or in the centre console) there is a USB socket for the connection of external audio sources.

**Note**
The socket must always be kept clean and dry.

An MP3 player, USB drive or an iPod can be connected to the USB port. These devices are operated via the controls and menus of the Infotainment system.

---

**Important information**

**MP3 player and USB drives**
- The MP3 players and USB drives connected must comply with the USB Mass Storage Class specification (USB MSC).
- Only MP3 players and USB drives with a sector size of 512 Bytes and a cluster size smaller or equal to 32 kBytes in the FAT32 file system are supported.
- Hard disk drives (HDD) are not supported.
- The following restrictions apply for the data stored on an MP3 Player or USB device:
  - Only MP3 files, WMA and (depending on Infotainment system) ACC files can be read. WAV files and all other compressed files cannot be played.
  - Maximum folder structure depth: 11 levels.
  - Maximum number of files that can be saved: 1000 files.
NAV150 IntelliLink: Minimum recommended storage capacity of USB drive is 4 GB. Recommended maximum storage capacity is 32 GB.

WMA files with Digital Rights Management (DRM) from online music shops may not play correctly or not at all.

Applicable playlist extensions: .m3u, .pls.

Playlist entries must be in the form of relative paths.

Playing saved audio files
Once connected, it is only possible to use the controls and menus of the Infotainment system to operate the audio device.

R15 BT USB, R16 BT USB, CD16 BT USB, CD18 BT USB - Playing music via USB socket

MP3 player / iPod / USB drives
The system detects the audio device when a USB device is connected and the current track is displayed automatically.

When a new audio device is connected, the first track in the first folder is played automatically. When reconnecting the device, the previously played track is resumed.

Depending on the audio device connected, select a folder (MP3 player, USB drive) or a playlist (portable digital music player).

The operation of data sources connected via USB is generally the same as for an audio/MP3/WMA CD.

Selecting a track
To select tracks directly (and change folders), first access the audio device menu structure by pressing OK during playback. Select tracks and change folders by turning and pressing the knob.

NAV150 IntelliLink - Playing music via USB socket

MP3 player / USB drives / iPod
The system detects the audio device when a USB device is connected and the current track is displayed automatically. The device type (MP3 player/USB drive or iPod) is also recognised and the relevant audio source mode (USB or iPod) is selected automatically.

When the MEDIA menu is active, the following submenus are available:
- Main/Player
- List
- Options

To switch between audio sources, press ▼ in top left corner. The following options are available:
- USB: Select to change the audio source to USB mode.

Note
During use, the battery of a connected USB device is charged or maintained.
- iPod: Select to change the audio source to iPod mode.
- BT: Refer to (NAV150 IntelliLink) "Playing music via Bluetooth" - 67.
- Aha: Aha® application for smartphones (available depending on version).
Refer to "Usage", Additional features (NAVI 50 IntelliLink) in the "Introduction" section ▶ 30.

- **AUX**: Refer to (NAVI 50 IntelliLink) "Aux input usage" ▶ 61.

**Main/Player**

Press to display the current track. In this display screen, the following options are available:

- • ▶ (press to skip to previous track, press and hold to fast rewind)
- • II/▶ (press to pause/play)
- • ▶▶ (press to skip to next track, press and hold to fast forward)

**List**

Displays a list of the tracks in the current album/folder. Press a particular track to play it directly.

**Note**

By default, albums are listed in alphabetical order.

If a USB drive is connected, all the folders will be at the same level on the tree structure.

To return to the previous level on the folder tree structure, press ◀.

**Options**

Press to display the following options:

- • Repeat (Off/Track/Folder/All)
- • Shuffle (On/Off)

**NAVI 80 IntelliLink - Playing music via USB socket**

**MP3 player / USB drives**

Change the audio source to USB mode to playback files from a connected USB device.

To access the media menu from the Home page, press MENU then Multimedia, followed by Media on the display screen.

Press + to open a pop-up menu (depending on version). The following options are available:

- • USB: Change the audio source to USB mode.
- • Auxiliary socket: Refer to (NAVI 80 IntelliLink) "AUX input" ▶ 61.
- • Bluetooth connection: Refer to (NAVI 80 IntelliLink) "Playing music via Bluetooth" ▶ 67.
- • SD card
- • CD player: Refer to (NAVI 80 IntelliLink) "AUX input" ▶ 61.

When USB mode is selected, the display includes the following options:

- • ▶ ◀ or ▶▶: Move to previous/next track.
- • II: Pause track.
- • Scroll bar for time elapsed: Scroll through tracks.
- • New selection: Choose another track from the connected audio source.
- • Current playlist: Access the current playback list.
- • ←: Return to previous screen.
- • +: Open pop-up menu; To change the audio source or access the track settings (e.g. switch on/off shuffle or repeat, show current track details, and access sound settings).
Disconnecting from USB socket

Playback is stopped immediately when the audio device is withdrawn from the USB socket.
Bluetooth music

General information
Bluetooth-enabled auxiliary audio sources (e.g. music mobile phones, MP3 players etc.), which support Bluetooth music protocol A2DP, can be connected wirelessly to the Infotainment system.

Important information
- The Infotainment system only connects to Bluetooth devices that support A2DP (Advanced Audio Distribution Profile). Connection issues may arise with early versions.
- The Bluetooth device must support AVRCP (Audio Video Remote Control Profile) version 1.0 or higher. If the device does not support AVRCP, only the volume can be controlled via the Infotainment system.
- Before connecting the Bluetooth device to the Infotainment system, become acquainted with its operating instructions for Bluetooth functions.

Operation
Prerequisites
The following prerequisites must be met, in order to control a Bluetooth-enabled audio device via the Infotainment system:
- The Bluetooth function of the Infotainment system must be activated.
  Refer to "Bluetooth connection" in the "Phone" section 112.
- The Bluetooth function of the Bluetooth-enabled auxiliary audio source must be activated (see audio device operating instructions).
- Dependent upon the audio source, it may be required to set that device to "visible" (see audio device operating instructions).
- The audio source must be paired and connected to the Infotainment system.
R15 BT USB, R16 BT USB, CD16 BT USB, CD18 BT USB - Playing music via Bluetooth

Bluetooth connection
A connection must be set up between the audio device and the Infotainment system via Bluetooth, i.e. the device must be paired to the vehicle before using it.
Refer to "Bluetooth connection" in the "Phone" section Ø 112.
- A maximum of 5 audio devices can be paired and saved in the device list, but only one can be connected at a time.
- If the device has both audio player and telephone functions, both functions will be paired. Pairing a mobile phone Ø 110.
- Phone functions will remain active while the audio player is in use, and audio playback will be suspended during phone use.

Pairing an auxiliary audio device to the Infotainment system
To pair the audio device, press TEL and select Pair device by turning and pressing OK. The Ready to Pair screen is displayed.
Then, on the audio device, search for Bluetooth equipment in the vicinity of the device.
Select My Radio (i.e. the name of the system) from the list on the audio device, then, if applicable, on the audio device keypad enter the pairing code shown on the Infotainment system display screen.

**Note**
If the audio device does not have a screen, enter the default pairing code on the device, then on the Infotainment system. Refer to the operating instructions for this default audio device pairing code, usually 0000. Depending on the device, the pairing code may need to be entered in reverse order, i.e. on the Infotainment system first.

If pairing fails, the system returns to the previous menu and a corresponding message is displayed. Repeat procedure if necessary.
When pairing is completed, a confirmation message followed by the name of the paired audio device is shown on the Infotainment system display screen.

**Note**
When a Bluetooth connection is active, controlling the audio device via the Infotainment system will discharge the audio device battery more rapidly.

Connecting an audio device
Audio devices are automatically connected to the Infotainment system after the pairing procedure is completed.
To connect any audio device that has been paired, or to connect to a different paired audio device than the current one, press TEL and select the Select Device menu. The device list shows the audio devices already paired.
Select the desired device from the list and confirm by pressing OK. A display message confirms connection.

**Disconnecting an audio device**
To disconnect an audio device from the Infotainment system, press TEL (or SETUP) and select **Bluetooth connection**. Select the desired device from the device list then select **Disconnect the device** by turning and pressing OK. A display message confirms disconnection.

Switching off the audio device or deactivating the Bluetooth function on the audio device also disconnects the device from the Infotainment system.

**Unpairing an auxiliary audio device from the Infotainment system**
If the list of paired audio devices is full, a new device can only be paired if an existing device is unpaired.

To unpair, i.e. to delete an audio device from the system memory, press TEL and select **Delete device**. Select the desired audio device from the list and press OK to confirm deletion when prompted.

**Operation via Infotainment system**
When paired and connected wirelessly, audio playback begins automatically.

The audio device can then be operated via the Infotainment system function buttons, rotary knobs and display menus.

The range of accessible functions that can be operated via the Infotainment system depends on the type of audio player.

The operation of the audio device when connected wirelessly is similar to the operations for the CD player.

**NAVI 50 IntelliLink - Playing music via Bluetooth**

**Bluetooth connection**
A connection must be set up between the audio device and the Infotainment system via Bluetooth, i.e. the device must be paired to the vehicle before using it.

Refer to (NAVI 50 IntelliLink) "Bluetooth connection" in the "Phone" section.

- A maximum of 5 audio devices can be paired and saved in the device list, but only one can be connected at a time (depending on version, up to 8 audio devices may be paired).
- If the device has both audio player and telephone functions, both functions will be paired. Pairing a mobile phone.
- Phone functions will remain active while the audio player is in use, and audio playback will be suspended during phone use.

**Pairing an auxiliary audio device to the Infotainment system**

To pair the audio device, press followed by SETTINGS on the display screen.

Select Bluetooth then either Search for Bluetooth device or External device authorisation.

On the audio device, search for Bluetooth equipment in the vicinity of the device.

Select the name of the Infotainment system (e.g. MEDIA-NAV) from the list on the audio device, then (if
required), on the audio device keypad, enter the pairing code shown on the Infotainment system display screen.

The default pairing code is 0000. To change this pairing code before the pairing procedure is started, select **Change passkey** to update.

**Note**
If the audio device does not have a screen, enter the default pairing code on the device, then on the Infotainment system. Refer to the operating instructions for this default audio device pairing code, usually 0000. Depending on the device, the pairing code may need to be entered in reverse order, i.e. on the Infotainment system first.

If pairing fails, repeat procedure if necessary.

**Note**
When a Bluetooth connection is active, controlling the audio device via the Infotainment system will discharge the audio device battery more rapidly.

---

**Connecting an audio device**
Audio devices are automatically connected to the Infotainment system after the pairing procedure is completed.

To change the audio device connected, press ☰ followed by ☰ SETTINGS on the display screen.

Then select **Bluetooth** followed by **View Bluetooth device list**. The device list shows the audio devices already paired.

Select the desired audio device from the list and confirm by pressing OK.

**Disconnecting an audio device**
Switching off the audio device or deactivating the Bluetooth function on the audio device disconnects the device from the Infotainment system.

**Unpairing an auxiliary audio device from the Infotainment system**
If the list of paired audio devices is full, a new device can only be paired if an existing device is unpaired.

To unpair, i.e. to delete an audio device from the system memory, press ☰ followed by ☰ SETTINGS on the display screen.

Select **Bluetooth** then **View Bluetooth device list**.

Select the desired audio device from the list, then press ☰ to delete the device. If required, delete all devices in the list by pressing Options followed by Delete all. Confirm with OK.

**Operation via Infotainment system**
When paired and connected wirelessly, audio playback begins automatically.

The audio device can then be operated via the Infotainment system display options.

The range of accessible functions that can be operated via the Infotainment system depends on the type of audio player.

The operation of the audio device when connected wirelessly is similar to the operations for playing saved audio files via the USB socket. Refer
to (NAVI 50 IntelliLink) "Playing music via USB socket" in the "USB port" section ◇ 64.

NAVI 80 IntelliLink - Playing music via Bluetooth

Bluetooth connection
A connection must be set up between the audio device and the Infotainment system via Bluetooth, i.e. the device must be paired to the vehicle before using it.

- There is a maximum number of audio devices that can be paired and saved in the device list, but only one can be connected at a time.
- If the device has both audio player and telephone functions, both functions will be paired.
- Phone functions will remain active while the audio player is in use, and audio playback will be suspended during phone use.

Pairing an auxiliary audio device to the Infotainment system
From the Home page, press MENU then Multimedia, followed by Settings on the display screen.
Select Media to access the media settings menu, then select the "Manage Bluetooth devices"/"Configure Bluetooth connection" option.
The pairing procedure is similar to pairing a mobile phone. Refer to (NAVI 80 IntelliLink) "Bluetooth connection" in the "Phone" section ◇ 112.

Connecting an audio device
Audio devices are automatically connected to the Infotainment system after the pairing procedure is completed.
At any time, change the audio source to Bluetooth mode to playback files from a connected Bluetooth device.
From the Home page, press MENU then Multimedia, followed by Media on the display screen.
Depending on version, press + (to open a pop-up menu). Select Bluetooth/Bluetooth connection to change the audio source to Bluetooth.

Disconnecting an audio device
Switching off the audio device or deactivating the Bluetooth function on the audio device disconnects the device from the Infotainment system.

Unpairing an auxiliary audio device from the Infotainment system
To unpair, i.e. to delete a device from the system memory:
From the Home page, press MENU then Multimedia, followed by Settings on the display screen.
Select Media to access the media settings menu, then select the "Manage Bluetooth devices"/"Configure Bluetooth connection" option.
Press < to open a pop-up menu. The following options are available:
- Disable Bluetooth: Select to deactivate the Bluetooth function on the Infotainment system.
Bluetooth music

- **Set TomTom visible**: Select to make the Infotainment system “visible” to other Bluetooth devices, allowing them to be paired to the system.
- **Disconnect all devices**: Select to disconnect all currently connected devices from the Infotainment system without deleting/unpairing them.
- **Delete device(s)**: Select to unpair a device from the Infotainment system.

The unpairing procedure is similar to unpairing a mobile phone. Refer to (NAVI 80 IntelliLink) "Bluetooth connection" in the "Phone" section 112.

**Operation via Infotainment system**

When paired and connected wirelessly, audio playback may begin automatically.

The audio device can then be operated via the Infotainment system display options.

The range of accessible functions that can be operated via the Infotainment system depends on the type of audio player.

The operation of the audio device when connected wirelessly is similar to the operations for playing saved audio files via the USB socket. Refer to (NAVI 80 IntelliLink) "Playing music via USB socket" in the "USB port" section 64.
External devices

Displaying pictures

NAVI 80 IntelliLink - Displaying pictures

To access the "Pictures" menu from the Home page, press MENU then Multimedia, followed by Pictures on the display screen.

Note
Playback is only possible when the vehicle is stationary.

Select the connected source device (e.g. SD card, USB) to access individual photos or present a slideshow of all compatible photos on the device.

The display includes the following options:
- 〈 or 〉: Move to previous/next photo.
- Thumbnails: Switch between full screen and minimised view.

Playing movies

NAVI 80 IntelliLink - Playing movies

To access the "Videos" menu from the Home page, press MENU then Multimedia, followed by Videos on the display screen.

Note
Playback is only possible when the vehicle is stationary.
Select the connected source device (e.g. SD card, USB) to access individual or all compatible videos on the device.

The display includes the following options:

- ◀ or ▶: Move to previous/next video.
- II: Pause video.
- Scroll bar for time elapsed: Scroll through videos.
- **New selection**: Choose another photo from the connected source device.
- **Full screen**: Switch to full screen display.
- ◀: Return to previous screen.
- +: Open pop-up menu; To change the source device or access the video settings.

During video playback, the pop-up menu also allows you to return to the list of videos.

Video settings - refer to (NAVI 80 IntelliLink) "System settings" ◇ 42.
Warning

The navigation system is an aid to your navigational abilities and does not replace them. Drive with due care and attention and adopt a safe, vigilant attitude.

If a navigation system instruction contradicts traffic regulations, the traffic regulations always apply.

The Navigation system will reliably guide you to your chosen destination without the need for physical road maps.

If the Traffic info service is available in your country or region, the current traffic situation is also considered in route calculations. The system receives traffic messages in the current reception area.

To receive the most up-to-date, real-time traffic information possible, subscribe to the Live services facility.

Note

Only available with NAVI 80 IntelliLink.

Functioning of the Navigation system

The position and movement of the vehicle are detected by the Navigation system using sensors.

The distance travelled is determined by the vehicle's speedometer signal, and turning movements on bends are determined by a gyro sensor. The position is determined by GPS (Global Positioning System) satellites.

By comparing these sensor signals with the digital maps on the Navigation system, it is possible to accurately determine the position of the vehicle.

When using the vehicle for the first time, or after a ferry trip, etc., the system will self-calibrate. It is, therefore, normal if it does not provide an exact location until the vehicle has travelled for some distance.
After the entry of the destination address or point of interest (nearest petrol station, hotel, etc.) the route is calculated from the current location to the selected destination.

Route guidance is provided by voice output and the display screen.

⚠️ Warning

Areas such as one-way streets and pedestrian zones are not marked on the navigation system map. In such areas, the system may issue a warning that must be accepted. Therefore, pay particular attention to one-way streets and other roads and entrances that must not be driven into.

**Note**

Depending on Infotainment system, radio reception may be interrupted during voice guidance and before each change of direction.

---

**USB memory stick (NAVI 50 IntelliLink)**

A USB memory stick is required for the Navigation system, to contain, among other things, a digital map of the towns and roads in your country.

**Note**

Use a USB memory stick, formatted to FAT32 format, with a minimum 4 GB and maximum 32 GB of storage capacity.

After delivery of a new vehicle, there is a maximum of 90 days in which to update the digital map for free. After this time has elapsed, a fee is charged for map updates.

**Note**

To avoid possible technical issues, only use a compatible USB memory stick for operating and updating the Navigation system. Do not insert USB memory stick in any other device (e.g. digital camera, mobile phone, etc.), or in another vehicle.

---

**Software installation**

To update the digital maps and to benefit from exclusive downloadable services, an account must be created on the opel.naviextras.com website and the free software must be installed.

**Creating an account**

Create your internet account via the opel.naviextras.com website. Select e.g., the "Register" option on the web page and enter the appropriate details.

**Installing the software**

Install the software on your computer by downloading from opel.naviextras.com.

Follow the on-screen instructions to install the software and launch the online application.

**Registering the Navigation system**

The Navigation system must be registered with your new internet account.

Insert an empty USB memory stick in the Navigation system’s USB slot. Press 🎭 then select ✻NAVI / ⬆Nav, followed by Options then Map update.
To ensure all content is saved in the Navigation system’s memory, select **Options** then **Update**. Wait for the update to complete before ejecting the USB memory stick.

Then insert the USB memory stick in your computer’s USB slot while connected to the Internet. When the online application is launched and the USB memory stick is recognised, the system (or software) name appears in the application window. The Navigation system is registered into your user profile.

After the initial set-up, the USB memory stick is automatically recognised by the Navigation system and by the online application.

**Updating the USB memory stick and Navigation system**

Updates are issued regularly, e.g. for map and safety camera revisions.

**Note**

In certain countries it is illegal to download and activate the camera warning option and this could lead to prosecution.

These updates are only available via the online application catalogue, which is accessed via the USB memory stick.

Using the online application, it is possible to:

- update the Navigation system (maps, safety cameras etc.)
- upgrade to premium POI content
- add or delete data
- customise the system

The online application menus guide you through these operations.

**System update**

To get the best from the Navigation system, update it as often as possible.

Insert the USB memory stick in the Navigation system’s USB slot. Available updates on the USB memory stick are recognised by the Navigation system and the 'Update' screen is displayed automatically.

Select **Update** to begin installing the updates to the Navigation system.

Wait for the update to complete before performing any other operation or ejecting the USB memory stick.

**SD card (NAVI 80 IntelliLink)**

An SD card is supplied with the Navigation system and contains, among other things, a digital map of the towns and roads in your country.

**Note**

After delivery of a new vehicle, there is a defined period in which to update the digital map for free. After this time has elapsed, a fee is charged
for map updates. Consult a workshop to purchase a new SD card with updated digital map.

**Note**
To avoid possible technical issues, only use a compatible SD card for operating the Navigation system. Do not insert SD card in any other device (e.g. digital camera, mobile phone, etc.), or in another vehicle.

**Usage**

**USB memory stick**

**NAVI 50 IntelliLink**
Inserting the USB memory stick
Switch off the Navigation system and insert the USB memory stick in the USB slot on the Infotainment system fascia. The USB memory stick is fragile; treat it with care.

Removing the USB memory stick
Switch off the Navigation system and remove the USB memory stick from the USB slot on the Infotainment system fascia.

**SD card**

**NAVI 80 IntelliLink**
Inserting the SD card
Switch off the Infotainment system and insert the SD card in its slot. The SD card is fragile; do not bend it.
Ensure the SD card is inserted the correct way. The orientation may differ, depending on location of the SD card slot in the vehicle.

Removing the SD card
To remove SD card from the Infotainment system, on the Home page press **MENU**, then **System** followed by **Remove SD card** on the display screen; The SD card can now be ejected safely.
To remove the SD card from its slot, press on the card then release it. The card is released slightly to enable it to be withdrawn.

**Note**
To avoid possible technical issues, only use a compatible SD card for operating and updating the Navigation system. Do not insert SD card in any other device (e.g. digital camera, mobile phone, etc.), or in another vehicle.

**Activating the Navigation system**

**Switching on**
The Navigation system switches on automatically when the ignition is switched on. In other cases, press ✪.
With the ignition off, the Navigation system can be used for upto 20 minutes. Press ✪ to switch on the Navigation system again. The system will automatically switch off upto 20 minutes after the last user input.

**Switching off**
With the ignition off, the Navigation system switches off automatically when the driver’s door is opened.
With the ignition on, press ✪ to switch off the Navigation system.
Switching between Navigation system and Infotainment system menus

NAVI 50 IntelliLink
With the Navigation system active, press 🏡 or press and hold ↱/⇲ on the display screen to return to the Infotainment system Home menu.

NAVI 80 IntelliLink
With the Navigation system active, press ← on the display screen (one or more times) to return to the Infotainment system Home page.

Information on the display

NAVI 50 IntelliLink (Type A) - Information on the display
Menu screen
To access the Navigation menu screen, press 🏡 followed by 🏡NAVÍ on the display screen.

The Navigation menu screen contains the following menus and submenus:

- **Destination**
  Refer to (NAVI 50 IntelliLink) "Destination input" 90.
  - Address
  - Points of Interest
  - History
  - Favourites
  - Find on Map
  - Coordinate

- **Route**
  Refer to (NAVI 50 IntelliLink) "Route information" and "Edit Itinerary" in the "Guidance" section 96.
  - Create Route/Edit Route
  - Avoidances
  - Overview
  - Cancel Route
  - Alternative Routes
  - Itinerary
  - Options
  Refer to (NAVI 50 IntelliLink) "Setting up the navigation system" below.
  - Warnings
  - Route settings
  - Map settings
  - Voice settings
  - Coordinate format
  - GPS
  - Map update

Map screen
To access the map screen without route guidance, press 🏡 followed by 🗺MAP on the display screen. Refer to (NAVI 50 IntelliLink) "Browse map" in the "Guidance" section 96.
Press anywhere on the map. The cursor indicates the current selected position. To scroll within the map, drag the cursor in the required direction.

To access the map screen with route guidance, press 🏛️ followed by NAVI on the display screen and enter a destination. Refer to (NAVI 50 IntelliLink) "Destination input" ☄️ 90.

The map screen (with or without route guidance) contains the following controls and information:

1. ⇦/⇨: Rotate map left/right
2. ⇧/⇩: Viewpoint (low/high view)
3. OK (with countdown timer): Confirm actions
4. Options menu
5. ←: Return to previous screen
6. +/−: Change scale (zoom in/out)
7. Compass (press to switch between 2D/3D map modes)
8. Name of the next major road or road sign information, if applicable
9. Current time
10. Direction and distance to next change of direction
11. Journey information, e.g. estimated arrival time, total remaining distance
12. Audio system information
13. 🗝️: Current location
14. Route calculated and direction changes
15. Home menu
16. 🎧/🔇: Voice guidance on/off
17. Speed limit

**Intersection view**
During route guidance, before each change of direction a close-up view of the intersection is automatically displayed. The normal view is resumed after passing the intersection.

**Motorway view**
During route guidance, before each motorway junction a 3D view of the junction is automatically displayed. The normal view is resumed after passing the junction.

**Note**
For some motorway junctions, only a small turn arrow may appear on the map.
NAVI 50 IntelliLink (Type B) - Information on the display
Menu screen
To access the Navigation menu screen, press \( \text{Home} \) followed by \( \text{Nav} \).

The Navigation menu screen contains the following menus and submenus:

• Advanced

6. NAVIGATION SERVICES
Refer to (NAVI 80 IntelliLink) "LIVE services" below.
• Traffic
• Speed Cameras
• Local search/TomTom places
• My TomTom live
• Weather

7. ITINERARIES
Refer to (NAVI 80 IntelliLink) "Edit Itinerary" in the "Guidance" section 96.

8. ←: Return to previous screen

Map screen
To access the map screen without navigation, on the Home page press MENU, then Navigation followed by View Map on the display screen.

Press anywhere on the map. The cursor indicates the current selected position. To scroll within the map, drag the cursor in the required direction.

To access the map screen with navigation, on the Home page press MENU followed by Navigation on the display screen and enter a destination. Refer to (NAVI 80 IntelliLink) "Destination input" 90.

The map screen (with or without route guidance) contains the following controls and information:

1. Speed limit (illuminates red and flashes if speed limit is exceeded)
2. ː Change scale (zoom in/out)
3. Name of the next major road or road sign information, if applicable
4. 🌬️ Outside air quality (depending on version)
5. 📞: Phone information
6. Outside temperature
7. Clock
8. Traffic information, e.g. route incidents, reception indicator, traffic map
9. Journey information, e.g. estimated arrival time, total remaining distance, journey status (green flag/red flag)
10. Compass (press to switch between 2D/3D map modes)
11. Change volume of guidance instructions
12. 📡: Pop-up menu
13. Direction and distance to next change of direction
14. Audio system information
15. : Current location (cursor)
   Route calculated and direction changes
16. : Return to previous screen

**Lane images**
During route guidance, before each major road change, a 3D view of the junction (with a turn arrow and road signs) is automatically displayed. The normal view is resumed after passing the junction.

To switch off the lane images view, refer to (NAVI 80 IntelliLink) "Advanced Settings" in "Setting up the navigation system" below.

**Automatic zoom**
During route guidance, before each change of direction a close-up view of the junction is automatically displayed. The normal view is resumed after passing the junction.

To switch off the automatic zoom feature, refer to (NAVI 80 IntelliLink) "Advanced Settings" in "Setting up the navigation system" below.

---

**Operating keyboards in the display**

**NAVI 50 IntelliLink - Operating keyboards in the display**
To move within and to enter characters in both the alphabetical and numerical keyboards, make the appropriate selection by touching the display screen.

- Select **Options** to change the keyboard type (e.g. Qwerty, ABC).
- Select **1^&** to switch to numbers and symbols.
- Select the drop down menu icon \(\) to display a list of results for the current operation (e.g. destination input).
- Entries can be corrected during input with the **keyboard** character.
- Press **** to stop using the keyboard and return to the previous screen.

**Note**
When making an entry, certain letters and numbers are unavailable for selection (greyed-out) based on the information stored in the Navigation system.

**NAVI 80 IntelliLink - Operating keyboards in the display**
To move within and to enter characters in both the alphabetical and numerical keyboards, make the appropriate selection by touching the display screen.

- Entries can be corrected during input with the **keyboard** character.
- Press **** to stop using the keyboard and return to the previous screen.

---

**Live services**

**NAVI 80 IntelliLink - Live services**
In addition to the free navigation services (e.g. traffic information, fixed speed cameras), extra features can be added by subscribing to paid LIVE services.
LIVE services include up-to-date traffic information with "HD Traffic™", updates and locations of fixed and mobile speed cameras, local search, weather forecast and the "My TomTom LIVE" subscription status.

Note
LIVE services are not available in some countries or regions.

From the Home page, press MENU then Navigation, followed by Navigation Services on the display screen.

The following menus are displayed:

- Traffic/HD Traffic
  Select to receive up-to-date, real-time traffic information.

Note
The HD Traffic service is named Traffic if a subscription has not been activated.

- Speed cameras
  Displays alerts and location of mobile speed cameras in real-time, fixed speed cameras and accident blackspots.

- Local search/TomTom places
  This service allows you to use a keyword to quickly find any Point of Interest (POI) and set it as a destination.

- My TomTom LIVE
  Displays expiry date of subscribed services.

- Weather
  The weather forecast service provides up to 5 days of weather reports for your current location and your chosen destination.

Switch function off via the "Speed Cameras" menu in "LIVE services", if required.

Note
In certain countries it is illegal to download and activate the camera warning option and this could lead to prosecution.

- Local search/TomTom places
  This service allows you to use a keyword to quickly find any Point of Interest (POI) and set it as a destination.

Setting up the navigation system

NAVI 50 IntelliLink - Setting up the navigation system
Press  followed by NAVI / then Options. This menu screen allows you to check and update the following map and navigation settings:

- Warnings
- Route settings
- Map settings
- Voice settings
- Coordinate format
- GPS
- Map update
- Traffic (depending on version)

Warnings
Select Warnings to access the following settings (switch off if not required):

- Warn when speeding (On/Off)
- Speed limit always visible (On/Off)
• Alert point warnings (On/Off)
• Pre-alert distance (0 m/200 m/500 m)

Available depending on version.

Warn when speeding: The digital map contains speed limits for certain roads. Audio and/or visual warnings are given when the vehicle exceeds the speed limit.

Speed limit always visible: The speed limit for certain roads is always visible on the screen.

Alert point warnings: When the vehicle passes an alert point (permanent or temporary) - i.e. when entering a potentially hazardous area requiring extra caution - audio and visual warnings are given.

Pre-alert distance: Select a distance from which notifications of alert point warnings should be given.

Note
Warnings may not be available for some roads and regions.

Route settings
Select Route settings to update the following settings for route calculation:
• Route planning method (Fast/Short/ECO)
• Motorways (On/Off)
• Period charge (On/Off)
• Per-use toll (On/Off)
• Ferries (On/Off)
• Carpool/HOV (On/Off)
• Unpaved roads (On/Off)

If necessary, press Options then Reset to defaults to set each of these options back to the factory default settings.

Alternatively, when the map is displayed (no route guidance is active), the Route settings menu can be accessed by pressing Options.

Refer to (NAVI 50 IntelliLink) "Information on the display", "Map screen" above for further information.

Route planning method: Select Fast to set the fastest route to the destination entered. This method assumes the vehicle travels at or near the speed limit on all roads.

Select Short to set the shortest route and minimise the total distance to travel to the destination entered.

Select Eco to set a compromise between the fastest and the shortest route planning methods. The route provided may be shorter than the fastest method, but not significantly slower.

Motorways: To include or exclude motorways from the route plan.

Turn off, e.g. when towing a vehicle, or when motorway driving is not permitted.

Note
Follow the regulations of the country in which you are driving.

Period charge: To include or exclude roads which require a special license to be purchased for certain periods.

Per-use toll: To include or exclude roads for which a toll must be paid to use the road once only.
Ferries: To include or exclude the use of ferries, ships and trains.

Carpool/HOV: To include or exclude carpool lanes and high-occupancy vehicle (HOV) lanes.

Unpaved roads: To include or exclude the use of unpaved roads, e.g. dirt, gravel roads.

Map settings
Select Map settings to access the following:

- **View mode** (3D/2D/2D North)
  2D North is available depending on version.
- **Viewpoint** (Low/Normal/High)
- **Motorway view** (On/Off)
- **POI markers**

Alternatively, when the map is displayed (no route guidance is active), the Map settings menu can be accessed by pressing Options.

Refer to (NAVI 50 IntelliLink) "Information on the display", "Map screen" above for further information.

**View mode:** Select **View mode** to change the default map mode between a 2D top-down view, a 3D perspective view and a 2D view with North always facing upwards.

Alternatively, press the Compass on the map to switch between map view modes.

**Viewpoint:** Select **Viewpoint** to raise or lower the map view.

Alternatively, when the map is displayed (no route guidance is active), press ↑/↓ to raise or lower the map view. They are greyed-out when the maximum position is reached.

**Motorway view:** Select **Motorway view** to switch on/off the motorway junction view for route guidance.

Refer to (NAVI 50 IntelliLink) "Information on the display", "Map screen" above for further information.

**POI markers:** Select ▶ alongside **POI markers** to display a list of Points of Interest (POI) types.

Use this screen to switch on/off (show or hide on map) certain POI type markers on the map, e.g. accommodation, airport, café or bar.

Select a POI type to open a list of its subcategories and switch on/off (show or hide) individual subcategories.

**Note**
POIs are only visible on the map depending on the zoom level.

**Voice settings**
Select **Voice Settings** to change voice guidance language.

Scroll the list of languages by pressing ▲/▼ then select a language and press OK to confirm selection.

**Coordinate format**
Select **Coordinate format** to change the format of co-ordinate entries to one of the following options:

- DD.DDDDD
- DD MM.MMM
- DD MM SS.S

**GPS**
Select **GPS** to view the GPS information, e.g. available satellites, their location and signal strength.
Map update
Select **Map update** to display the following digital map content and latest update information:

- Alert Points
- Junction View
- Maps
- Places
- Preprocessed Road Network

Specific content or all map content can be updated. Select one of the options first or press **Options** then **Update**. Wait for the update to complete.

Refer to "USB memory stick" (NAVI 50 IntelliLink), "Updating the USB memory stick and Navigation system" in the "General information" section 75.

Traffic
Select **Traffic** to change the following traffic information settings:

- **Traffic info** (On/Off)
- Detour
- Event types

**Traffic info**: Warnings are given for incidents that occur along the route.

**Detour**: Save time by using an alternative route when a traffic jam or an incident occurs along the current route. Select 'On'/"Off" alongside "Confirm offered route?" as required. If necessary, update the time value for the option "Offer detour if the calculated route saves more than:" (e.g. 5 minutes) by pressing ◀/▶.

**Event types**: Select the type of events to be displayed during route guidance, e.g. all events, traffic flow events, closures and blockages, accidents.

**NAVI 80 IntelliLink - Setting up the navigation system**
To access the Navigation settings menu from the Home page, press **MENU** then **Navigation**, followed by **Settings** on the display screen. The following settings submenus are displayed:

- **Turn off voice guidance:**
  Switch on/off voice guidance during navigation.

- **Route planning:**
  Select a planning preference type; "Fastest route" is recommended. The eco-route is designed to save the most fuel. Then switch on/off "iQ routes™" as required. iQ routes™ enables routes to be calculated according to average traffic levels during a particular day and time, and also the best route according to actual traffic speeds.

- **Show POI on map:**
  Show or hide categories of POI markers on the map.

- **Manage POIs:**
  Add, change or delete POIs or POI categories.

- **Voice (depending on version):**
  Select synthesised voice or a male or female human voice (for the voice instructions) from the available list.

  Human voices provide more simplified voice guidance instructions and are not available
when using the Voice recognition function 105.

- **Set home location:**
  Change the home or most used destination address.

- **Manage saved locations:**
  Delete or rename saved destination addresses.
  To rename, select an address from the displayed list, press Rename then enter a new name. Press Done to confirm. To delete a selected address, press Delete and confirm when prompted.

- **Switch map:**
  If more than one map is installed on the SD card, use this option to switch between the saved maps.
  Select "Change map" then choose the desired map from the options available.

- **Change map colours:**
  Change day and night colours used on Navigation map.
  For downloaded new colours; choose a new colour, select additional colour scheme, then choose the desired colour from the options available.

- **Car symbol:**
  Change the vehicle icon used on the 3D navigation map.

- **Advanced:**
  Select from the following advanced options:
  - **Map information:**
    Show/hide information displayed on the map, e.g. address number before street name, street names/current street name, name of street after current street.
  - **Map behaviour:**
    Change how the map operates with the following options:
    Show lane images (e.g. at motorway junctions), rotate map with vehicle direction (2D mode only), switch to 3D mode automatically during guidance, zoom automatically (2D mode, 3D mode).
  - **Traffic source:**
    Choose a traffic information source from the available list.

### Destination input

**NAVI 50 IntelliLink - Destination input**

**Select a destination**
Press 🎉 followed by 🎉NAV 🎉 then Destination.

The following menu options are available for entering a destination:

- **Address**
  Enter an address using the keyboard.

- **Points of Interest**
  Select Points of Interest (POI), e.g. petrol station, restaurant, parking.

- **History**
  Select from a list of previous destinations.
• Favourites
Select from a saved list of favourite destinations.

• Find on map
Select a destination by using the digital map.

• Coordinate
Enter the co-ordinates of the destination.

After a destination has been entered, wait for the 10 second countdown to expire or press OK to begin route guidance immediately.

Enter an address
Select Address and enter part or all of an address, e.g.:

• Country
• Town or Postcode
• Street
• Number
• Intersecting street

Note
Full addresses can only be entered if they are recognised by the Navigation system.

When entering an address for the first time, press Country, then use the keyboard to enter the name of the country required. Alternatively, use the drop down menu icon and select from a list of suggested countries.

Note
When entering an address, certain letters and numbers are unavailable for selection (greyed-out) based on the addresses recognised by the Navigation system.

Proceed in the same way to enter details for Town or Postcode, Street, Number and Intersecting street.

Note
When entering a Postcode, insert a space after the first part of the postcode.

The address is automatically stored in the memory, available for future selection.

For keyboard operation, refer to (NAVI 50 IntelliLink) "Operating keyboards in the display" in the "Usage" section 78.

Note
Number and Intersecting Street are only available after a Street has been entered.

When entering a Street, it is not necessary to specify the type of road (street, avenue, boulevard etc.).

Select Points of Interest (POI)
POIs can be selected as a destination using the following search options:
• Preset POI list
• POI categories
• Quick search for POIs via the map

Preset POI list
Select Points of Interest to choose from the frequently-used preset categories list (e.g. petrol station, parking, restaurant).

POI categories
Select Points of Interest followed by Custom Search to select from the list of categories and subcategories.
The search for POIs differs depending on the current situation:

- If route guidance is active, Petrol station and Restaurant POIs are searched for along the route, and Parking POIs are searched for around the destination.
- If there is no active route guidance, POIs are searched for around the current position.
- If the current position is not available (i.e. no GPS signal), POIs are searched for around the last known position.

The following options are available:

- **In a Town/Suburb**
  To search for a POI within a selected town/suburb (the resulting list is ordered by distance from the town centre).

- **Along Route**
  To search for a POI along the current route (the resulting list is ordered by length of the required detour).

- **Around My Position**
  To search for a POI around the current position (the resulting list is ordered by distance from this position).

- **Around Destination/Vicinity of the destination**
  To search for a POI around the destination of the current route (the resulting list is ordered by distance from the destination).

When a list of POIs is displayed, they can be sorted or displayed on the map. Press Options to display the following:

- Sort by name
- Sort by distance
- Show all on map

Quick search for POIs
Press anywhere on the map. The cursor indicates the current selected position. To scroll within the map, drag the cursor in the required direction.

Press Options followed by Points of Interest Around Cursor to show nearby POI names and their distance from the selected position on the map.

Alternatively, press Find and use the keyboard to search for a destination by name.

Select from previous destinations list
Select History to access a list of previously entered destinations.

To sort the list, press Options to display the following:

- Sort by name
- Sort by distance
- Delete all

Alternatively, press Find and use the keyboard to search for a destination by name.

Select from Favourites list
Select Favourites to access a list of saved favourite destinations.

When the list of favourites is displayed, they can be sorted or displayed on the map. Press Options to display the following:
• Sort by name
• Sort by distance
• Show all on map
• Delete all

Alternatively, press Find and use the keyboard to search for a favourite by name.

Select a destination by using the map
Select Find on Map to begin a search for a destination by scrolling the map.
Press anywhere on the map. The cursor indicates the current selected position. To scroll within the map, drag the cursor in the required direction.
Press OK to select the position as a destination.

Enter the co-ordinates of the destination
Select Coordinate to begin a search for a destination by entering its co-ordinates.

To change the format of the co-ordinates, press Options and select from the following:
• Latitude/Longitude
  Values can be entered in any of the following formats:
  • Decimal degrees
  • Degrees and decimal minutes
  • Degrees, minutes and decimal seconds
• UTM (Universal Transverse Mercator)

Confirm the destination
When a destination has been selected, the route appears on the map. Press OK and set as a New route.
If route guidance is active, the destination can be set as a Waypoint along the route.

Add and save a favourite
When a destination has been selected, press Options to display the following:
• Add to Favourites: Save the destination in the favourites list.
• Current traffic: Provides information on traffic incidents (depending on version).
  Refer to (NAVI 50 IntelliLink) "Traffic information" in the "Guidance" section 96.
• Info/News: Displays information (e.g. address) for the selected POI.
  Shows the location (address) of the position selected, provides the GPS coordinates (latitude/longitude) and also, if applicable, displays the phone number of a selected POI.
• Back to car: Return to current vehicle location.
Before saving a favourite, the name of the favourite can be changed by using the keyboard.
Navigation

For keyboard operation, refer to (NAVI 50 IntelliLink) "Operating keyboards in the display" in the "Usage" section 78.

Delete a favourite
When a favourite has been selected, press Options before starting route guidance followed by Delete Favourite and confirm deletion.
To delete all favourite destinations, select the menu Destination then Favourites followed by Options then Delete all and confirm deletion.

NAVI 80 IntelliLink - Destination input

Select a destination
From the Home page, press MENU then Navigation followed by Drive to... on the display screen.
Select a destination from the following options on the display:
- Home
- Saved locations
- Address
- Recent destinations
- Local search/TomTom places
- Point of Interest
- Point on Map
- Latitude Longitude

Home
Guides you to your home address.
To store the address of your home location, from the Home page, press MENU then Navigation, followed by Settings on the display screen.
Select Set home location and enter an address.
Refer to (NAVI 80 IntelliLink) "Setting up the navigation system" in the "Usage" section 78.

Saved locations
Select from a list of previously saved destinations.
To delete or rename saved destinations, from the Home page, press MENU then Navigation, followed by Settings on the display screen.
Then select Manage saved locations and update the selected destination as required.

Refer to (NAVI 80 IntelliLink) "Setting up the navigation system" in the "Usage" section 78.

Address
Enter part or all of an address using the keyboard, e.g.:
- Country
- Postcode
- Town/City
- Street
- House number

Note
Full addresses can only be entered if they are recognised by the Navigation system.

When entering an address for the first time, the country of the destination will be requested. Use the keyboard to enter the name of the country required.
Suggestions may be shown on the display during input. Press to select a destination shown in the display, or press List to access the full list for the current part of the address.
Note
When entering an address, certain letters and numbers are unavailable for selection (greyed-out) based on the addresses recognised by the Navigation system.

Proceed in the same way to enter a Postcode or enter details for Town/City, Street and Number.

Note
When entering a Postcode, insert a space after the first part of the postcode.

The address is automatically stored in the memory, available for future selection.

For keyboard operation, refer to (NAVI 80 IntelliLink) "Operating keyboards in the display" in the "Usage" section on page 78.

Recent destinations
Select from a list of previous destinations that have been automatically stored.

Local search/TomTom places
Select a nearby Point of Interest (POI) by entering key words using the keyboard.

Latitude Longitude
Enter the co-ordinates of the destination.

Confirm the destination
When a destination has been selected, the route appears on the map and a route summary is provided in the "tab.

Press the LIVE tab to view real-time traffic information. For further information, refer to (NAVI 80 IntelliLink) "LIVE services" in the "Usage" section on page 78.

Press Done to confirm the route.

Add and save a favourite
Add to saved locations
From the Home page, press MENU then Navigation followed by Drive to... on the display screen.

Select Recent destinations and choose a destination from the displayed list.

Press (to open a pop-up menu) then Add to saved locations, give a name to the destination using the keyboard, then press Next.
A message is displayed asking if the saved address should be set as the Home address. Select Yes or No. A message is displayed confirming that the address has been saved.

Add Favourite
On the Home page, press ★ to open the favourites menu and select Navigation.
To set a saved destination as a favourite, press + (to open a pop-up menu), then Add Favourite.
Choose from the displayed list to add a saved destination to the favourites.
For further information, refer to (NAVI 80 IntelliLink) "Favourites" in the "Introduction" section 30.

Delete a favourite
On the Home page, press ★ to open the favourites menu and select Navigation.
Press + and select Remove all Favourites or select a favourite from the displayed list then press Remove a Favourite. A confirmation message is displayed. Press Delete to confirm.

For further information, refer to (NAVI 80 IntelliLink) "Favourites" in the "Introduction" section 30.

Guidance

Route information

NAVI 50 IntelliLink - Route information
To view the route before guidance begins, press ★ followed by NAVI / Nav then Route after a destination has been entered.
For the various methods of entering a destination, refer to (NAVI 50 IntelliLink) "Destination input" 90.

The following options are available:

- Edit Route
  Refer to (NAVI 50 IntelliLink) "Edit Itinerary" below.

- Avoidances/To avoid
  Refer to (NAVI 50 IntelliLink) "Edit Itinerary" below.

- Overview
  See below.

- Cancel Route
  Refer to (NAVI 50 IntelliLink) "Deactivating guidance" below.

- Alternative Routes
  Refer to (NAVI 50 IntelliLink) "Edit Itinerary" below.

- Itinerary/Route
  Refer to (NAVI 50 IntelliLink) "Edit Itinerary" below.

Overview
When the Route screen is displayed, press Overview to get a detailed plan for the current route and a bird's eye view of the route on the map.
This menu option contains the following information:

- name and/or address of the destination
- total time of the route
- total distance of the route
- special points and sections of the route (e.g. toll roads, motorways, etc.)
- alternative routes (e.g. Short, Fast, Economical)
When the **Overview** screen is displayed, press **Options** to access the following submenus:

- **Alternative routes**
  Refer to (NAVI 50 IntelliLink) "Edit Itinerary" below.

- **Itinerary**
  Refer to (NAVI 50 IntelliLink) "Edit Itinerary" below.

- **Route settings**
  Refer to (NAVI 50 IntelliLink) "Setting up the Navigation system" 78.

- **Simulate navigation**
  See below.

**Note**
These options can also be accessed during route guidance by pressing on the 'Journey information' (e.g. estimated arrival time, total remaining distance) area of the display screen.

Refer to (NAVI 50 IntelliLink) "Information on the display" in the "Usage" section 78.

---

**Simulate navigation**
This function enables you to see a rapid view of the suggested route.

The following options are available:

- **/ / / / / / / /** Start or pause the route simulation
- **⇌** Move to previous manoeuvre
- **⇌** Move to next manoeuvre
- **1x / 4x / 8x**: Increase the speed of the route simulation
- **←/ ↔**: Return to previous screen

---

**NAVI 80 IntelliLink - Route information**
To view the route before guidance begins, press + (to open a pop-up menu), then select **Route details** after a destination has been entered.

The following options are available:

- **Display instructions**: Displays the route plan.
  The following details are shown:
  - direction change arrows
  - road types

- **Display route map**: View a map of the route.

- **Display route demo**: View a demonstration of the route.

- **Route summary**: Return to the previous screen. The details of the journey time, distance and the type of journey are displayed. Refer to (NAVI 80 IntelliLink) "IQ routes™" in the "Destination input" section 90.

- **Display destination**: View changes in direction as images.

- **Display traffic on route**: Displays an overview of all traffic incidents affecting the current journey, with a detailed incident by incident view.
  
  With a subscription to LIVE services, the "Live" tab provides
a more detailed overview of the journey (e.g. traffic delays, fixed and mobile speed cameras).
For further information, refer to (NAVI 80 IntelliLink) "LIVE services" in the "Usage" section 78.

Edit itinerary

NAVI 50 IntelliLink - Edit Itinerary
This function makes it possible to view and change the route plan to the destination entered.

To access at any time, press  followed by  then Route. Select Itinerary/Route.
The following information will appear:
- direction change arrows
- road number
- distance before a direction change
Press Options to change and sort the details of the route.

The following options are available:
- **Summary**
  Shows each waypoint and the destination, including the waypoint distance, time left to next waypoint and arrival time.
- **Normal**
  Shows each manoeuvre, with street or place names, distance, and route section numbers.
  This option also shows signpost information, access and manoeuvre restrictions, warnings and system preference information.
- **Road list**
  Shows only the main sections of the route using road names/numbers.
  This option also shows the length of each section, time left to next section, arrival time and average direction.

Alternatively, these itinerary/route options can be changed by pressing the "Direction and distance to next change of direction" tab on the display during route guidance. Press Options to change and sort the details of the route.

Refer to (NAVI 50 IntelliLink) "Information on the display", "Map screen" in the Usage section 78.

Edit route
To edit the route by modifying the list of waypoints, press  followed by  then Edit Route on the display screen.
The following options are available:
- Top : Add waypoint
- Bottom : Add new destination
- : Delete destination
- : Change the route departure address (available depending on version)

To change the order of the waypoints in the list, press Options followed by Re-order then move the waypoints up/down.

For the various methods of entering a destination, refer to (NAVI 50 IntelliLink) "Destination input" 90.
Avoidances
To edit the route by avoiding particular sections, press ⚡NAVI / 🔄Nav, Route then Avoidances/To avoid on the display screen.
Select a section from the list on the display screen to be avoided. The avoided section is highlighted in red.
Confirm the new route by pressing OK.

Alternative routes
To change the route planning method, press ⚡NAVI / 🔄Nav, Route then Alternative routes on the display screen.
The following options are available, each with a distance and estimated time:
- fast
- short
- eco
Select one of the options and confirm the new route by pressing ←.

For further information, refer to (NAVI 50 IntelliLink) "Setting up the navigation system" in the "Usage" section 78.

NAVI 80 IntelliLink - Edit Itinerary
Journeys can be planned in advance by selecting both the starting point and the destination.
From the Home page, press MENU then Navigation, followed by Itineraries on the display screen.
Select a point of departure in the same way as entering a destination.
Refer to (NAVI 80 IntelliLink) "Destination input" 90. Then select a destination, choose the type of route and confirm.
The system plans the route and allows you to view the details.

The following options are available:
- Calculate alternative
- Cancel route
- Travel via
- Avoid roadblock
- Avoid part of route
- Minimise delays

Calculate alternative
Select to calculate an alternative route to the destination.

Cancel route
Select to stop the current route guidance.
To restart guidance, press Drive to..., followed by Recent destinations on the display screen and select the route again.

Travel via (waypoints)
Select to change the calculated route to your destination so that it includes a particular location (waypoint).
The location to be included is entered the same way as entering a destination.
Select from the same list of options, e.g. "Address", "Saved locations", "Point of Interest", "Point on map".
Refer to (NAVI 80 IntelliLink) "Destination input" 90.

Avoid roadblock
Select this option in the event a roadblock is not currently indicated by the Traffic information service.
Refer to (NAVI 80 IntelliLink) "Traffic information" below.
Choose the distance (in metres) of the route ahead to be avoided, e.g. "100m", "500m", "2000m", "5000m".
The route is recalculated to avoid a section of the route for the distance selected.

Avoid part of route
Select to avoid a part of the route.
Choose the road to be avoided from the list of roads along the route.

Minimise delays
Select to plan the route based on the latest traffic information.

Deactivating guidance
NAVI 50 IntelliLink - Deactivating guidance
To stop route guidance when in progress, press ⌈Nav, Route then Cancel Route on the display screen.

NAVI 80 IntelliLink - Deactivating guidance
To stop guidance when in progress, press ⌈Nav, Route then Cancel Route on the display screen.

Browse map
NAVI 50 IntelliLink - Browse map
To access the map screen at any time, press ⌈MAP on the display screen.
Press anywhere on the map. The cursor indicates the current selected position. To scroll within the map, drag the cursor in the required direction.

For further control operations, refer to (NAVI 50 IntelliLink) "Map screen" in the "Usage" section 78.

Options menu
When the map screen is displayed, press Options to display the following:

- Route settings:
  Refer to (NAVI 50 IntelliLink) "Setting up the navigation system" in the "Usage" section 78.

- Map settings:
  Refer to (NAVI 50 IntelliLink) "Setting up the navigation system" in the "Usage" section 78.

- Where am I?:
  Refer to (NAVI 50 IntelliLink) "HELP!" below.

NAVI 80 IntelliLink - Browse map
To access the map screen without navigation, on the Home page press MENU, then Navigation followed by View Map on the display screen.
Press anywhere on the map. The cursor indicates the current selected position. To scroll within the map, drag the cursor in the required direction.
When the map screen is displayed, press + to open a pop-up menu containing the following options:

- **Use this location to...**
- **Find**
- **Change the map details**
- **Add to saved locations**

**Use this location to...**
Select this option to perform any of the following actions:

- centre the map on the vehicle's location
- navigate to a point on the map
- search for a point on the map
- add a point on the map to the favourites
- add a point on the map to the POI list
- correct the position of your vehicle

**Find**
Select this option to centre the map on:

- your home
- a saved address

- an address
- a recent destination
- a local search
- a point of interest
- current vehicle position
- a co-ordinate (latitude/longitude)

**Change the map details**
Select this option to switch on/off the following map settings:

- traffic
- names
- points of interest (POI)
- satellite image map background
- GPS co-ordinates

**Add to saved locations**
Select this option to add the current position on the map as a saved destination. Use the keyboard to enter a name or confirm the suggested name.

For keyboard operation, refer to (NAVI 80 IntelliLink) "Operating keyboards in the display" in the "Usage" section \(\text{§} \ 78\).

---

**Help!**

NAVI 50 IntelliLink - Help!
When the map screen is displayed, press **Options** followed by **Where am I?** to check helpful information about the current location and to search for Points of Interest (POI) nearby.

To access the map screen at any time, press \(\text{§} \) followed by **MAP**.

**Where am I?**
This menu option contains the following information:

- current location (address)
- latitude
- longitude
- altitude
- GPS status

Press **Options** to display the following options:

- **Add to favourites**
  Refer to (NAVI 50 IntelliLink) "Destination input", "Add and save a favourite" for further information \(\text{§} \ 90\).

- **Country information**: Refer to "Country information" below.
Country information
This function allows you to check country information and legislation for the current location.

When the Where am I? screen is displayed, press Options followed by Country information on the display screen.

This menu option contains the following information:
- speed limits
- phone country code (International dialling code, e.g. +49)
- emergency number (e.g. 112)
- legal restrictions, e.g.:
  - vehicle equipment requirements, e.g. warning triangle, first aid kit, fire extinguisher, spare bulbs, high-visibility jacket etc.
  - headlights legislation
  - maximum blood alcohol level
  - snow chains legislation
  - winter tyres legislation

Help Nearby
This function allows you to search for assistance near your current location.

When the Where am I? screen is displayed, press Help Nearby on the display screen.

This menu option contains the following information:
- Car repair around here (Vehicle repair services)
- Health around here (Medical and emergency services)
- Police around here (Police stations)
- Petrol/Service station around here (Fuel stations)

Select the appropriate option to access a list of local Points of Interest (POI).

For information on Points of Interest (POI), refer to (NAVI 50 IntelliLink) "Destination input" ▷ 90.

Traffic information

NAV 50 IntelliLink - Traffic information
Available depending on version, up-to-date traffic information from local sources can be received. Information is provided for the current route or for the current vehicle location.

During route guidance, press Options then select Current traffic, or press the traffic icon 🟢 on the map screen. Traffic incidents along the route and estimated delay times are displayed.

The following options are available:
- Event list: Select to change event display settings.
- Offer detour: Create an alternative route to the selected destination.
- Options: Access traffic options.

To access these traffic options at any time, press 📍 followed by 🆎NAVI / 🆎Nav then Options. Then select 🟢Traffic.

Press 🔄 to return to route guidance.
NAV 80 IntelliLink - Traffic information
Allows up-to-date traffic information from local sources to be received.
The navigation system indicates traffic incidents with voice messages, the traffic information bar and also by displaying symbols on the map.
Refer to "Symbols overview" 103.
The system receives updates approx. every 15 minutes and traffic incidents are shown for major roads only.
The Traffic service is named HD Traffic if a subscription to LIVE services has been activated. With HD Traffic, updates are received approx. every 3 minutes and traffic incidents are shown for minor roads also.
For further information, refer to (NAV 80 IntelliLink) "LIVE services" in the "Usage" section 78.

Depending on the current traffic situation, the traffic information bar can include the following information:
- heavy delays on the route (given in minutes)
- unknown or indeterminate situation (grey)
- slow traffic (orange)
- traffic jam (red)
- stationary traffic or road closed (dark red)
- distance before next incident (in km/miles)

To manage the Traffic information service, select from the following options:
- **Minimise delays**
  Alter journey based on the latest traffic information.
- **Display traffic on route**
  Displays an overview of all traffic incidents on the current route. Press incident icons for more detailed information.

- **Explore map**
  Select to explore the map and stay up-to-date with the traffic situation in the area.
The map displays the last searched location. Press incident icons for more detailed information.
- **Read traffic information aloud during the route**
  Activates voice guidance for traffic information.

**Traffic service settings**
Select Traffic Settings and tick the box alongside the required preferences (e.g. automatically minimise delays after every traffic update) and select Done to confirm.

**Symbols overview**

- : Accident
- : Traffic jam
- : One or more lanes closed
- : Road closed
- : Traffic incident
Navigation

- ⚠️: Ice
The voice recognition function allows you to operate certain functions via voice input.

To ensure that conversations held inside the vehicle do not start unintentional calls to a saved contact, the voice recognition function must first be activated via ⬌ on the steering column controls.

Control elements overview ⬦ 6.

**NAVI 50 IntelliLink**

Available depending on version, the voice recognition function of the handsfree phone system allows you to operate certain functions of a compatible smartphone via voice input.

Refer to "Phone control" in this section ⬦ 107.

To confirm that a paired and connected smartphone is compatible with the voice recognition function, press ☀ followed by ☀Setting on the display screen.

Then select Bluetooth followed by View Bluetooth device list. The list shows the paired devices and ⬁ appears alongside the name of the smartphone to indicate compatibility.

**Note**

If supported, the language set on your smartphone will automatically be used by the Infotainment system for voice recognition.

The navigation system can also be operated using voice controls. Refer to "Navigation control" in this section ⬦ 106.

**Prerequisites**

The following prerequisites must be met:

- The Bluetooth function of the Infotainment system must be activated.
  
  Refer to "Bluetooth connection" in the "Phone" section ⬦ 112.

- The Bluetooth function of the Bluetooth-enabled smartphone must be activated and the smartphone must have a 3G, 4G
or wi-fi connection (see smartphone operating instructions).

- Dependent upon the smartphone, it may be required to set the device to "visible" (see smartphone operating instructions).
- The smartphone must be paired and connected to the Infotainment system.

**Help**
For information and help with activating and operating voice controls, press 📞 followed by ✉Setting then Bluetooth on the display screen.

Select Smartphone from the list (press ▼/▲ to search list), then press ► to access help.

A series of screens are displayed, explaining how to use the voice recognition function and information on the following:
- switching on/off with steering column controls
- compatible phones

- operation methods
- available functions and descriptions
- conditions of use

**NAVI 80 IntelliLink**
The voice recognition function allows you to operate certain functions via voice input, including:

- **Navigation**
  Refer to "Navigation control" in this section ◊ 106.

- **Phone**
  Refer to "Phone control" in this section ◊ 107.

Press 3️⃣ on the steering column controls to open the Voice control main menu. After the tone, say the name of the menu you wish to access.

When activated, the Voice control main menu is displayed and the voice recognition indicator in the top right corner indicates system status and optimisation levels:
- **Green** : optimal voice recognition
- **Orange** : good voice recognition
- **Red** : average voice recognition

**Microphone 🎤** : System is ready to receive a voice command

**Loudspeaker 🔊** : Voice instructions are currently being given by the system

**Loading icon 🔄** : Data currently loading

**Navigation control**

**NAVI 50 IntelliLink**

**Activating voice recognition**
To activate the voice recognition function during navigation:
Press 3️⃣ on the steering column controls; 3️⃣ appears, alongside the audio system information, in the bottom right corner of the display.

**Note**
During use of the voice recognition function, audio source playback is interrupted.

For a guide to using voice commands, refer to (NAVI 50 IntelliLink) "Help" in the "General information" section ◊ 105.
NAVII 80 IntelliLink

Activating voice recognition
To activate the voice recognition function:
Press \( \text{\textcircled{5}} \) on the steering column controls to open the **Voice control** main menu.

After the tone, say "Destination" to enter a new address. Say "Address" then say the full destination of a new address (number, street name, destination town/city).

The address recognised by the system is displayed. Confirm destination when prompted to begin guidance.

Alternatively, after the tone say "Recent destinations" to access a list of the most recent destinations entered and select the desired destination.

For further information, refer to (NAVII 80 IntelliLink) "Destination input" in the "Navigation" section \( \#90 \).

---

Phone control

NAVII 50 IntelliLink

Activating voice recognition
To activate the voice recognition function:
Press \( \text{\textcircled{5}} \) on the steering column controls to open the **Smartphone** menu; a beep sounds and \( \text{\textcircled{5}} \) appears on the display, indicating activation.

To use voice recognition, press \( \text{\textcircled{5}} \) on the display (or press \( \text{\textcircled{5}} \)).

**Note**
During operation of the voice recognition function, **Radio** and **Media** functions are not available for use.

To deactivate, press and hold \( \text{\textcircled{5}} \) on the display (or press \( \text{\textcircled{5}} \)).

For a guide to using voice commands, refer to (NAVII 50 IntelliLink) "Help" in the "General information" section \( \#105 \).

---

NAVII 80 IntelliLink

Activating voice recognition
To activate the voice recognition function:
Press \( \text{\textcircled{5}} \) on the steering column controls to open the **Voice control** main menu.

After the tone, say "Phone" to access the Phone menu. Say the name of a saved contact or a telephone number. The desired contact appears in the display when registered by the system.

Say "Call" to start the dialling process. Say "Delete" to cancel input and retry.

Alternatively, to initiate a call directly from the **Voice control** main menu, press \( \text{\textcircled{5}} \) and say the name of a saved contact or a telephone number.
**General information**

The handsfree phone system provides you with the possibility of having mobile phone conversations via the vehicle's microphone and loudspeakers, as well as operating the most important mobile phone functions via the Infotainment system.

To be able to use the handsfree phone system, the mobile phone must be connected with it via Bluetooth.

Not all handsfree phone system functions are supported by every mobile phone. The possible phone functions depend on the relevant mobile phone and network provider. Refer to the operating instructions for your mobile phone or consult your network provider.

**Important information for operation and traffic safety**

Note
Favourites can be accessed at any time by pressing ★ on the Home page.

Operating keyboards in the display

R15 BT USB, R16 BT USB, CD16 BT USB, CD18 BT USB - Operating keyboards in the display
To move within and to enter characters in the numerical keyboard shown on the display screen: Turn and press OK.
Entries can be corrected during input with the ← keyboard character.
Press → to stop using the keyboard and return to the previous screen.

NAVI 50 IntelliLink, NAVI 80 IntelliLink - Operating keyboards in the display
To move within and to enter characters in the numerical keyboard, make the appropriate selection by touching the display screen.
Entries can be corrected during input with the  keyboard character.
Press ← to stop using the keyboard and return to the previous screen.

Connection

A mobile phone must be connected to the handsfree phone system in order to control its functions via the Infotainment system.
No phone can be connected to the system unless it has first been paired. Refer to the Bluetooth connection section (➔ 112) for pairing a mobile phone to the handsfree phone system via Bluetooth.
When the ignition is switched on, the handsfree phone system searches for paired phones in the vicinity.
Bluetooth must be activated on the mobile phone for the phone to be recognised by the handsfree phone system. Searching continues until a paired phone is found. A display message indicates that the phone is connected.

Note
When a Bluetooth connection is active, using the handsfree phone system will discharge the mobile phone battery more rapidly.

Automatic connection

For your phone to connect automatically when the system is switched on, it may be necessary to activate the automatic Bluetooth connection function on your mobile phone; refer to the mobile phone operating instructions.

Note
Depending on Infotainment system, when reconnecting to a paired phone, or when 2 paired phones are within range of the handsfree phone system, either the priority phone (if defined) or the last connected phone is connected automatically, even if
this phone is outside the vehicle but still within range of the handsfree phone system.

During automatic connection, if a call is already in progress, the conversation will automatically switch to the vehicle’s microphone and loudspeakers.

If connection fails:
- check the phone is switched on
- check the phone battery is not flat
- check if the phone has already been paired

The Bluetooth function on the mobile phone and on the handsfree phone system must be active and the mobile phone must be configured to accept the system connection request.

Manual connection
R15 BT USB, R16 BT USB, CD16 BT USB, CD18 BT USB - Manual connection
To change the phone connected to the handsfree phone system, press TEL and select the Select Device menu. The device list shows the phones already paired.

Select the desired phone from the list and confirm by pressing OK. A display message confirms phone connection.

NAVI 50 IntelliLink - Manual connection
To change the phone connected to the handsfree phone system, press MENU then Phone followed by Settings on the display screen. Then select Manage devices. The device list shows the phones already paired. Select the desired phone from the list.

Disconnecting a phone
If the mobile phone is switched off, the phone is automatically disconnected from the handsfree phone system.

During disconnection, if a call is already in progress, the conversation will automatically switch to the mobile phone.

Select the desired phone from the list and confirm by pressing OK. Depending on version, ⚫ appears alongside the selected phone, to indicate connection.

NAVI 80 IntelliLink - Manual connection
To change the phone connected to the handsfree phone system, from the Home page, press MENU then Phone followed by Settings on the display screen.

Then select Manage devices. The device list shows the phones already paired. Select the desired phone from the list.
Phone

R15 BT USB, R16 BT USB, CD16 BT USB, CD18 BT USB - Disconnecting a phone
To disconnect a phone from the Infotainment system, press TEL (or the SETUP) and select Bluetooth connection. Select the desired device from the device list then select Disconnect the device by turning and pressing OK. A display message confirms phone disconnection.

NAVI 50 IntelliLink - Disconnecting a phone
Depending on version, to disconnect a phone from the Infotainment system, press SETTINGS then Bluetooth on the display screen (or select Phone from the Home page). Then select View Bluetooth device list and press on the connected phone shown in the displayed list to disconnect it; ■ appears alongside the phone, to indicate disconnection.

NAVI 80 IntelliLink - Disconnecting a phone
To disconnect a phone from the Infotainment system, from the Home page, press MENU then Phone followed by Settings on the display screen. Then select Manage devices. Select the connected phone in the displayed list to disconnect.

Defining the priority phone
R15 BT USB, R16 BT USB, CD16 BT USB, CD18 BT USB - Defining the priority phone
The priority phone is the last connected phone. When the ignition is switched on, the handsfree phone system searches first for the priority paired phone. Searching continues until a paired phone is found.

Bluetooth connection
Bluetooth is a radio standard for the wireless connection of, e.g., a telephone with other devices.

Information such as a mobile phone contact list and call lists can be transferred. The functionality can be restricted depending on the phone model.

Prerequisites
The following prerequisites must be met, in order to control a Bluetooth-enabled mobile phone via the Infotainment system:
• The Bluetooth function of the Infotainment system must be activated.
• The Bluetooth function of the Bluetooth-enabled mobile phone must be activated (see mobile phone operating instructions).
• Dependent upon the mobile phone, it may be required to set the device to "visible" (see mobile phone operating instructions).
• The mobile phone must be paired and connected to the Infotainment system.
Activating Bluetooth function of the Infotainment system

R15 BT USB, R16 BT USB, CD16 BT USB, CD18 BT USB - Activating Bluetooth

To enable the Infotainment system to recognise and operate a Bluetooth-enabled mobile phone, the Bluetooth function must first be activated. Deactivate the function if not required.

Press TEL and select Bluetooth by turning and pressing OK.

Select ON or OFF and confirm by pressing the knob.

NAVI 50 IntelliLink - Activating Bluetooth

Press 7 followed by SETTINGS on the display screen.

Select Bluetooth to display the following options:

● View Bluetooth device list
● Search for Bluetooth device
● External device authorisation
● Change passkey
● Smartphone

Available depending on version. For help with activating and operating voice controls - refer to "Voice recognition" 105).

When the Bluetooth screen is displayed, Bluetooth-enabled devices can be paired to the Infotainment system.

NAV1 80 IntelliLink - Activating Bluetooth

To access the Phone settings menu from the Home page, press MENU then Phone followed by Settings on the display screen.

The following options are displayed:

● Manage devices
● Sound levels
● Voice mail
● Turn Bluetooth on/off
● Automatically download phone data (on/off)

Press Turn Bluetooth on to tick the box ☑ alongside it. Bluetooth-enabled devices can now be paired to the Infotainment system.

Refer to (NAVI 80 IntelliLink) "Phone settings" in the "Operation" section for further information 116.

Pairing a mobile phone to the handsfree phone system

In order to use your handsfree phone system, a connection must be set up between the mobile phone and the system via Bluetooth, i.e. the mobile phone must be paired to the vehicle before using it. For this purpose, the mobile phone must support Bluetooth. Refer to the operating instructions for your mobile phone.

To set up a Bluetooth connection, the handsfree phone system must be switched on and Bluetooth must be activated on the mobile phone.

Note

If another phone is automatically connected during a new pairing procedure, it will automatically be disconnected, to allow the new pairing procedure to continue.
Pairing enables the handsfree phone system to recognise and store a mobile phone in the device list. A maximum of 5 mobile phones can be paired and stored in the device list, but only one can be connected at a time.

**Note**
Depending on version of NAVI 50 IntelliLink, a maximum of 8 mobile phones can be paired.

When pairing is completed, a message with the name of the paired phone is shown on the Infotainment system display screen and the phone is automatically connected to the handsfree phone system. The mobile phone can then be operated via the Infotainment system controls.

**Note**
When a Bluetooth connection is active, using the handsfree phone system will discharge the mobile phone battery more rapidly.

**R15 BT USB, R16 BT USB, CD16 BT USB, CD18 BT USB - Pairing a mobile phone**
To pair a phone to the handsfree phone system, press TEL and select **Pair device** by turning and pressing **OK**. The **Ready to Pair** screen is displayed.

On the mobile phone, search for Bluetooth equipment in the vicinity of the device.

Select **My Radio** (i.e. the name of the handsfree phone system) from the list on the mobile phone, then, on the mobile phone keypad, enter the pairing code shown on the Infotainment system display screen.

If pairing fails, the system returns to the previous menu and a corresponding message is displayed. Repeat procedure if necessary.

**NAVI 50 IntelliLink - Pairing a mobile phone**
Press **7** followed by **SETTINGS** on the display screen.

Select **Bluetooth** then either **Search for Bluetooth device** or **External device authorisation**.

Alternatively, when in the **Phone** menu screen, press **?</button>** on the display. On the mobile phone, search for Bluetooth equipment in the vicinity of the device.

Select the name of the handsfree phone system (e.g. **MEDIA-NAV**) from the list on the mobile phone, then (if required), on the mobile phone keypad, enter the pairing code shown on the Infotainment system display screen.

**Note**
The pairing code may only be shown on the Infotainment system display for a limited time.

The default pairing code is **0000**. To change this pairing code before the pairing procedure is started, select **Change passkey** to update.

If pairing fails, repeat procedure if necessary.
NAVI 80 IntelliLink - Pairing a mobile phone
To access the Phone settings menu from the Home page, press MENU then Phone followed by Settings on the display screen.

Select Manage devices from the list of options. A message appears on the display asking if you wish to set up a Bluetooth connection between your device and the Infotainment system. Select Yes to continue. The Infotainment system begins a search for Bluetooth equipment in the vicinity and displays a list of devices.

Select your device from the displayed list. Depending on phone model, confirm the pairing request or enter the pairing code on the mobile phone keypad to pair it to the Infotainment system.

To pair further devices, from the Manage devices screen, press + to open a pop-up menu and select Add to pair additional devices in the same way.

If pairing fails, repeat procedure if necessary.

Unpairing a mobile phone from the handsfree phone system
If the list of paired phones is full, a new phone can only be paired if an existing phone is unpaired.

**Note**
Unpairing a phone erases all of its downloaded contacts and its call history from the handsfree phone system phonebook.

**R15 BT USB, R16 BT USB, CD16 BT USB, CD18 BT USB - Unpairing a mobile phone**
To unpair, i.e. to delete a phone from the handsfree phone system memory, press TEL and select Delete device.

Select the desired phone from the device list and press OK to confirm deletion when prompted.

**NAVI 50 IntelliLink - Unpairing a mobile phone**
To unpair, i.e. to delete a phone from the handsfree phone system memory, access the Manage devices screen.

From the Home page, press MENU then Phone followed by Settings on the display screen.

Select Manage devices, then press + to open a pop-up menu, select Delete and remove the selected device from the list.

Select Bluetooth then View Bluetooth device list.

Select the desired phone from the device list, then press 📞 to delete the device. If required, delete all devices in the list by pressing Options followed by Delete all. Confirm by pressing OK.

**NAVI 80 IntelliLink - Unpairing a mobile phone**
To unpair, i.e. to delete a phone from the handsfree phone system memory, access the Manage devices screen.

From the Home page, press MENU then Phone followed by Settings on the display screen.

Select Manage devices, then press + to open a pop-up menu, select Delete and remove the selected device from the list.
Emergency call

⚠️ Warning
Connection setup cannot be guaranteed in all situations. For this reason, do not rely exclusively on a mobile phone when a vitally important communication (e.g. a medical emergency) is concerned. On some networks, it may be necessary for a valid SIM card to be properly inserted in the mobile phone.

⚠️ Warning
Bear in mind that you can only make and receive calls with the mobile phone if it is in a service area with a sufficiently strong signal.

Under certain circumstances, emergency calls cannot be made on all mobile phone networks; it is also possible that emergency calls cannot be made when certain network services and/or telephone functions are active. Consult your network provider for more information.

The emergency call number differs depending on country or region. Please enquire beforehand about the correct emergency call number for the relevant country or region.

Dial the emergency call number (refer to "Operation" 116); A telephone connection to the emergency call centre is set up.
Answer when the service personnel questions you about the emergency.

⚠️ Warning
Do not end the call until you are requested to do so by the emergency call centre.

NAV 50 IntelliLink
To view the emergency number for the current location, press # followed by MAP (available depending on version) on the display screen.

Press Options then Where am I?. When the Where am I? screen is displayed, press Options followed by Country information on the display screen: Emergency number (e.g. 112) is shown on the display.

Operation
Introduction
When a Bluetooth connection has been set up between your mobile phone and the handsfree phone system, certain functions of your mobile phone can be operated via the Infotainment system controls or display.

It is then possible, e.g., to import the contacts and telephone numbers stored in your mobile phone into the handsfree phone system.

After connection, the mobile phone data is transmitted to the handsfree phone system. This can take some time, depending on phone model. During this period, operation of the
mobile phone is possible via the Infotainment system only to a limited extent.

**Note**
Not every mobile phone supports the functions of the handsfree phone system. Therefore, deviations from the range of functions described are possible.

**Phone menu**

To display the Phone menu:
- press `TEL` - or -  
- press TEL - or -  
- press `followed by `Phone` on the display screen
  (NAVI 50 IntelliLink) 

from the Home page, press `MENU` followed by `Phone` on the display screen
(NAVI 80 IntelliLink)

**Volume control**

R15 BT, R16 BT USB, CD16 BT, CD18 BT USB - Volume control

During a call, turn or press or (on the steering column controls) to change the call volume.

**NAVI 50 IntelliLink - Volume control**

During a call, press – or + on the Infotainment unit to change the call volume.

Alternatively (with the steering column controls), press or .

**NAVI 80 IntelliLink - Volume control**

During a call, turn () on the Infotainment unit to change the call volume.

Alternatively (with the steering column controls), press or .

**Dialling a telephone number**

Several options are available for dialling telephone numbers, including calling a contact from the phonebook or from a call log. Numbers can also be dialled manually.

**Entering a number manually**

R15 BT USB, R16 BT USB, CD16 BT USB, CD18 BT USB - Entering a number manually

With the Phone menu displayed, select Dial from the list.

Enter the desired number using the numerical keyboard (108) and select to start dialling.

To redial the last number, press and hold TEL.

**NAVI 50 IntelliLink - Entering a number manually**

With the Phone menu displayed, press in top left corner and select Dial from the list.

Enter the desired number using the numerical keyboard and select to start dialling.

To redial the last number, press and hold TEL.

**NAVI 80 IntelliLink - Entering a number manually**

With the Phone menu displayed, press in top left corner and select Dial from the list.

Enter the desired number using the numerical keyboard and select to start dialling.

To redial the last number, press and hold TEL.

Refer to (NAVI 50 IntelliLink) "Operating keyboards in the display" in the "General information" section 108.
Entries can be corrected during input with the ◁ keyboard character. Press and hold ◁ to delete all numbers at once.

**NAVI 80 IntelliLink - Entering a number manually**
From the Home page, press MENU then Phone followed by Dial a number on the display screen. Enter the desired number using the numerical keyboard and press Call to start dialing.

Entries can be corrected during input with the ◁ keyboard character.

**Phonebook**

The phonebook contains contact lists available only to the current vehicle user. For reasons of confidentiality, each downloaded contacts list can only be viewed when the corresponding phone is connected.

R15 BT USB, R16 BT USB, CD16 BT USB, CD18 BT USB - Phonebook
After pairing the mobile phone to the Infotainment system, the contact list in the mobile phone is downloaded to the handsfree phone system.

To dial a number from the phonebook, with the Phone menu displayed, select Phonebook and select the desired contact from the alphabetical list. Press OK to start the dialling process.

**NAVI 80 IntelliLink - Phonebook**
After pairing the mobile phone to the Infotainment system, the contact list in the mobile phone is downloaded to the handsfree phone system.

**Note**
Data sharing must be authorised on your phone. Refer to the operating instructions for your mobile phone or consult your network provider.

The feature "Automatically download phone data" must also be switched on in the Infotainment phone settings menu. Refer to (NAVI 80 IntelliLink) "Phone settings" below.

From the Home page, press MENU then Phone followed by Phone book on the display screen. To dial a number from the phonebook, select the desired contact from the list. If a contact has
more than one saved number, select the appropriate number when prompted.

After the initial pairing of the phone with the Infotainment system, the system can be updated with the latest contacts on your mobile phone. Press ‡ to open a pop-up menu and select Update telephone data. If necessary, select Help from the pop-up menu for assistance.

To add a contact to your list of favourites, press ‡ and select Add a contact to the Favourites page.

**Note**
Favourites can be accessed at any time by pressing ★ on the Home page.

For further information, refer to (NAVI 80 IntelliLink) "Favourites" in the "Introduction" section 30.

---

**Call lists**

**R15 BT USB, R16 BT USB, CD16 BT USB, CD18 BT USB - Call lists**
To dial a number from the call history lists (e.g. dialled numbers, received calls, missed calls), select the relevant option, e.g. Recent calls from the Call list menu. Select the desired contact and press OK to start the dialling process.

**NAVI 50 IntelliLink - Call lists**
After connecting the mobile phone to the Infotainment system, the list of dialled numbers, received calls and missed calls in the mobile phone are transferred automatically to the handsfree phone system.

With the Phone menu displayed, press ▼ in top left corner and select Calling Lists from the list.

To dial a number from the call history lists, select from the following options on the display:
- ✆ All: Displays list of all calls in the below lists.
- ✆: Dialled numbers.
- ✆: Received calls.
- ✆: Missed calls.

**Note**
The number of missed calls is shown alongside the symbol.

The most recent calls are displayed at the top. Select the desired contact from the chosen list to start the dialling process.

**NAVI 80 IntelliLink - Call lists**
After connecting the mobile phone to the Infotainment system, the list of dialled numbers, received calls and missed calls in the mobile phone are transferred automatically to the handsfree phone system.

**Note**
Data sharing must be authorised on your phone. Refer to the operating instructions for your mobile phone or consult your network provider.

The feature "Automatically download phone data" must also be switched on in the Infotainment phone settings menu. Refer to (NAVI 80 IntelliLink) "Phone settings" below.
From the Home page, press **MENU** then **Phone** followed by **Call logs** on the display screen.

To dial a number from the call history lists, select from the following options on the display:

- **All**: Displays list of all calls in the below lists.
- **📞**: Received calls.
- **✓**: Missed calls.
- **📞**: Dialled numbers.

The most recent calls are displayed at the top. Alternatively, press 4 or 1 to move up/down in the display.

Select the desired contact from the chosen call list to start the dialling process.

**Note**

If necessary, press ‹ (to open a pop-up menu) and select **Update telephone data** to update the call lists.

---

**Voicemail box**

**R15 BT USB, R16 BT USB, CD16 BT USB, CD18 BT USB - Voicemail box**

To listen to mobile phone voicemail messages via the Infotainment system while the phone is connected, select the **Voicemail box** menu.

**NAVI 80 IntelliLink - Voicemail box**

To listen to mobile phone voicemail messages via the Infotainment system while the phone is connected, from the Home page, press **MENU** then **Phone** followed by **Voice mail** on the display screen.

The configuration screen will be displayed if the voicemail box is not configured. Enter number on the numerical keyboard and confirm.

---

**Receiving calls**

**R15 BT USB, R16 BT USB, CD16 BT USB, CD18 BT USB - Receiving calls**

To accept the call, depending on vehicle configuration:

- Briefly press 📞 (on the steering column controls).
- Select the 📞 icon in the display (by turning and pressing OK).

To reject the call, depending on vehicle configuration:

- Press and hold ✗ (on the steering column controls).
- Select the ✗ icon in the display (by turning and pressing OK).

When receiving a call, the caller number may be shown on the Infotainment system display screen. If the number is stored in the system memory, the name is displayed instead. If the number cannot be displayed, the message **Private number** is shown.
NAVI 50 IntelliLink - Receiving calls
To accept the call:
- Press Accept/Agree on the display screen.
- Briefly press 7 (on the steering column controls).

To reject the call:
- Press Refuse/Reject on the display screen.
- Press and hold 8 (on the steering column controls).

When receiving a call, the caller number may be shown on the Infotainment system display screen. If the number is stored in the system memory, the name is displayed instead. If the number cannot be displayed, the message Unknown/Unknown number is shown.

Functions during a telephone call
R15 BT USB, R16 BT USB, CD16 BT USB, CD18 BT USB - Functions during a telephone call
In addition to volume control, various functions are available during a call, including:
- switch the call to the mobile phone
- access the keyboard
- end call

Turn and press OK to select and confirm.

Switch the call from the handsfree phone system to the mobile phone by selecting the mobile phone display item. Some mobile phones may become disconnected from the handsfree phone system during the switch to this mode.

A number can also be entered on the numerical keyboard (108) e.g. to control a voice server such as the voicemail box. Select the #123 display item to access the numerical keyboard. Refer to "Voicemail box" for further information.

To end the call, depending on vehicle configuration:
- briefly press 8
- press TEL
- select the icon in the display

NAVI 80 IntelliLink - Receiving calls
To accept the call:
- press Pick up on the display screen
- briefly press 7 (on the steering column controls)

To reject the call:
- press Reject on the display screen
- press and hold * (on the steering column controls)

When receiving a call, the caller number may be shown on the Infotainment system display screen. If the number is stored in the system memory, the name is displayed instead. If the number cannot be displayed, the message No Caller ID is shown.

Functions during a telephone call
R15 BT USB, R16 BT USB, CD16 BT USB, CD18 BT USB - Functions during a telephone call
In addition to volume control, various functions are available during a call, including:
- switch the call to the mobile phone
- access the keyboard
- end call

Turn and press OK to select and confirm.
Phone

• ✅/🗑: transfer conversation to mobile phone
• 📞: transfer conversation to vehicle’s microphone and loudspeakers
• ⬅: Return to previous screen (e.g. Navigation or Home page)

NAVI 80 IntelliLink - Functions during a telephone call
In addition to volume control, various functions are available during a call, including:
• Place call on hold: Press ↩ (to open pop-up menu) then select On hold. Press Continue to resume the call.
• Transfer conversation to mobile phone: Press ↩ (to open pop-up menu) then select Handset.
  In some cases, the phone may be disconnect from the Infotainment system during a call transfer.
• End call: Press End call.
• Return to previous menu: Press ←.

Phone settings
NAVI 50 IntelliLink - Phone settings
Restore default phone settings
To access the settings menu at any time, press ⬅ followed by SETTINGS on the display screen. Select System followed by Factory settings then Phone to restore phone settings to their default values. Confirm by pressing OK.

Display software version
To access the settings menu at any time, press ⬅ followed by SETTINGS on the display screen. Select System followed by System version to display the software version.

NAVI 80 IntelliLink - Phone settings
From the Home page, press MENU then Phone followed by Settings on the display screen. Select from the following options on the display:
  • Manage devices:
    Refer to (NAVI 80 IntelliLink) "Pairing a mobile phone" in the "Bluetooth connection" section ▶ 112.
  • Sound levels:
    To set the handsfree phone system call volume and the ringtone.
  • Voice mail:
    Refer to (NAVI 80 IntelliLink) "Voicemail box" above.
  • Turn Bluetooth on/off:
    Refer to (NAVI 80 IntelliLink) "Activating Bluetooth" in the "Bluetooth connection" section ▶ 112.
  • Automatically download phone data:
    Press this option to tick the box ☑ alongside it.
  When pairing and/or connecting the mobile phone to the Infotainment system, the contact list and call lists in the mobile phone can now be downloaded to the handsfree phone system. Data sharing must also be authorised on your phone. Refer to the operating instructions for
your mobile phone or consult your network provider.

Mobile phones and CB radio equipment

Installation instructions and operating guidelines

The vehicle specific installation instructions and the operating guidelines of the mobile phone and handsfree manufacturer must be observed when installing and operating a mobile telephone. Failure to do so could invalidate the vehicle type approval (EU directive 95/54/EC).

Recommendations for fault-free operation:

- professionally installed exterior antenna to obtain the maximum range possible
- maximum transmission power 10 watts
- installation of the phone in a suitable spot, consider relevant Note in the Owner’s Manual section Airbag system

Seek advice on predetermined installation points for the external antenna or equipment holder and ways of using devices with a transmission power exceeding 10 watts.

Use of a handsfree attachment without external antenna with mobile telephone standards GSM 900/1800/1900 and UMTS is only permitted if the maximum transmission power of the mobile telephone is 2 watts for GSM 900 or 1 watt for the other types.

For reasons of safety, do not use the phone while driving. Even use of a handsfree set can be a distraction while driving.

⚠️ Warning

Operation of radio equipment and mobile telephones which fail to meet above mentioned mobile telephone standards is only permitted using an antenna located outside of the vehicle.

Caution

Mobile telephones and radio equipment may lead to malfunctions in the vehicle electronics when operated inside the vehicle with no exterior antenna, unless the above mentioned regulations are observed.
