ADAM FEATURES / OPTIONS

SAFETY

Driver/passenger airbags

- Driver's airbag • Front passenger's airbag • Front seat side-impact airbags
- Full-size curtain airbags for front and rear seat passengers

Seating

- Height-adjustable front seat head restraints • Outer rear seat head restraints
- Anti-submarining ramps in front seats – Helps prevent occupants sliding underneath the lap belt during a collision.

Seatbelts

- Height-adjustable front seatbelts • Four inertia-reel lap and diagonal seatbelts • Front seatbelt pretensioner system – Pretensioners tighten the seatbelt in the event of an accident limiting forward movement. • Front seatbelt force limiters – Reduces potential upper body injuries during a frontal impact. • Front and rear 'seatbelt unfastened' warning light

Child safety

- Deactivation switch for front passenger's front and side-impact airbags – Permits the safe use of a child seat in the front passenger seat. • ISOFIX child seat mountings incorporating top tether anchor points located on rear seats (does not include child seat) – Allows ISOFIX child safety seats to be securely fixed into the car. The ISOFIX mounting system reduces forward movement in an accident and makes the child seat easier to install.

Driver/passenger safety

- Energy-absorbing steering column • Pedal release system – Reduces potential injury to the driver's legs and feet during a severe frontal impact. • Laminated windscreen • Side-impact protection beams • Reinforced passenger safety cell • Deformation zones front and rear

Pedestrian safety

- Bonnet/headlight/wiper structure – Designed to reduce pedestrian head and upper body injuries.
- Upper and lower bumper design – Reduces upper and lower leg injuries.

Stability

Electronic Stability Programme (ESP):

– Works in conjunction with the vehicle's electronic braking and engine systems to keep the car stable in many different situations. ESP monitors many different inputs to determine when the car starts to lose traction, it can then immediately respond by varying the brake pressure between up to three wheels and adjust the engine output to help correct the loss of traction and improve stability.

Additional ESP features:

- Traction control • Cornering brake control • Straight line stability control

Braking

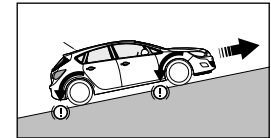

Anti-lock Braking System (ABS):

– Prevents the vehicle's wheels from locking up under heavy braking by momentarily reducing brake pressure at the appropriate wheel, ensuring that you can maintain control of the steering.

Additional braking features:

– The same electronic systems used in the ABS and ESP also deliver exceptional braking performance.

- Emergency brake assist – When emergency braking is detected the vehicle automatically applies the maximum possible braking assistance.
- Electronic brakeforce distribution – Automatically apportions the optimum braking force to each wheel. • Adaptive brake lights – Automatically warns other road users of heavy braking. • Hill start assist – Briefly maintains rear brake pressure to stop the vehicle rolling back on an incline. • Hazard warning lights

Tyre pressure

- Tyre pressure monitoring system

SECURITY

Standard security features

- 'Key left in ignition' audible warning • Electronically protected audio equipment • Engine deadlock immobiliser
- Visible Vehicle Identification Number (VIN) • Locking wheel bolts for alloy wheels
