# NEW SAFETY.

## THERE WHEN YOU NEED IT.

Built for the fast-moving demands of the 21st century, Astra is made for people who love to get behind the wheel but want the benefits of smart sensing technology.

**FORWARD COLLISION ALERT WITH AUTOMATIC EMERGENCY BRAKING<sup>1,2,4</sup>**  
The system monitors the traffic situation in front of the vehicle and if a collision situation is detected, braking is activated. Also includes pedestrian detection that automatically activates itself above 8 km/h.

**FOLLOWING DISTANCE INDICATOR<sup>1,2</sup>**  
Uses the front camera to measure the distance to the vehicle in front. This distance is shown in seconds in the instrument cluster warning you to slow down.

**LANE DEPARTURE WARNING WITH LANE ASSIST<sup>1,2</sup>**  
Warning signals protect against unintentional gradual drifting – and the steering wheel even nudges gently if you move out of your lane without signalling. The real genius? It won't sound an alarm when you don't need one. For example, if you need to swerve hard to avoid an obstacle.

**TRAFFIC SIGN RECOGNITION<sup>2</sup>**  
This advanced sign-detection system picks up and displays speed limits and other important traffic signs and even recognises temporary electronic signage.

**LED HEADLIGHTS**  
Because leading technology also means saving energy, Opel's powerful and efficient full-LED headlights only consume 20 watts which results in less CO<sub>2</sub> per car.

<sup>1</sup>Opel driver assistance systems are intended to support the driver within the limitations intrinsic to the system. The driver remains responsible for the driving task. <sup>2</sup>Standard on SRi and Elite models. <sup>3</sup>Optional on SRi and Elite models. <sup>4</sup>Automatic Emergency Braking with Pedestrian Detection works automatically above 8 km/h and below 80 km/h. The brakes are applied decelerating the vehicle with 0,5 g in the upper speed range (40 km/h–80 km/h) and full deceleration in the lower speed range (8 km/h–40 km/h).
