**New Astra's petrol and diesel engines meet the Real Driving Emissions Step 2 (RDE2) standards.**

#Fuel consumption figures are determined according to the WLTP test cycle. Full data relating to WLTP test cycles can be found at: [www.opel.ie/wltp](http://www.opel.ie/wltp)

\*CO<sub>2</sub> emissions figures are determined according to the WLTP test cycle however, a Government formula is then applied to translate these figures back to what they would have been under the outgoing NEDC test cycle, which WLTP replaces. The correct tax treatment is then applied.

Figures are intended for comparability purposes only. The fuel consumption you achieve under real life driving conditions and CO<sub>2</sub> produced will depend upon a number of factors, including the accessories fitted after registration, variations in driving styles, weather conditions and vehicle load. Only compare fuel consumption and CO<sub>2</sub> with other vehicles tested using the same technical procedures. For more information contact your local Opel Dealer.

# SPECIFICATIONS

## Transmission

### Six-speed manual gearbox:

Petrol engines: 1.2 (110/145PS) Turbo models

Diesel engines: 1.5 (105/122PS) Turbo D models

### Stepless automatic transmission:

The stepless automatic transmission is designed to offer seamless smooth and efficient switching that maximizes fuel economy. The LuK chain along with the Long Travel Torque Converter Damper improve the overall fuel economy, optimize the minimum turbine speed and offer improved isolation. The stepless automatic transmission is available on the 1.4 (145PS) Turbo.

### 9-Speed Automatic

Available on the new 1.5 (122PS) Turbo D, the new, first in segment 9-speed automatic transmission enables increased drive comfort and improved fuel economy. For extra reliability the transmission has been engineered with reducing the amount of splash losses, hydraulic losses and the amount of torsional vibrations.

**Please note:** For Active models fitted with optional air conditioning 15kg must be added to gross vehicle weight. **Gross vehicle weight** is the total permissible weight of the vehicle including passengers and their luggage. The **maximum roof rack loading** should not exceed 75kg. The **maximum towing weights** are based on the ability of the car, with two occupants of 75kg each, to restart on a 12% gradient, which is approximately 1 in 8.3, at sea level. The permitted trailer load applies up to the specified incline and up to an altitude of 1000 metres above sea level. The permissible gross train weight decreases by 10% for every 1000 metres of additional altitude. At altitudes above 1500 metres, the engine output may drop with a corresponding reduction in towing capability. Any extra weight, such as luggage or additional passengers, should be deducted from the maximum towing weight. With a trailer fully loaded, **maximum noseweight** should not exceed 55kg. Always fit Opel towing attachments and accessories available from your Opel Dealer. They are designed specifically for Opel models and carry a 12-month guarantee.
