

OPEL COMBO LIFE ELECTRIC /

Price and Specification Guide | Ireland | July 2023

[FIND OUT MORE](#)

Customer Notice:

Dear customer,

The enclosed Price and Equipment Guide reflects Irish pricing and specification in normal circumstances.

Please be advised however, Opel is impacted by temporary challenges in the global supply chain, including certain component shortages. Unfortunately, in the first instance, this means some customers may experience significant delays to delivery.

In the second instance, due to the present production challenges, some options for models across the Opel range are unavailable until further notice. Furthermore, Opel may temporarily offer vehicles with substituted equipment or features in place of standard equipment, or may suspend features temporarily.

These are measures taken to secure production of vehicles for customers.

As information becomes available from our manufacturer and working with our partners in the Opel Dealer Network in Ireland, Opel Ireland will endeavour to keep customers up to date regarding the order status and equipment featured on their new vehicles.

E&OE July 2023. Images shown for illustration purposes only. Please discuss colours available with your local Opel Dealer. *Optional at extra cost. Standard paint at no optional extra cost. Due to the limitations of the printing process, the colours reproduced may vary slightly from the actual paint colour and trim material. As a result, they should be used as a guide only. Your Opel dealer has a comprehensive display of paint finishes.

COMBO-e LIFE EV SPECIFICATIONS

Single-speed electronic drive selector

As the motor is an all-electric single-speed drive unit, there is no need for multiple gears. Instead, the shifter lets the driver select from the following:

- Park
- Reverse
- Neutral
- Drive
- Braking (for increased regenerative braking)

Drive Mode Selector

The driver can determine the driving style through selecting one of the following modes:

- Power: with high power reserves for the highest top speed and torque. Recommended at full capacity.
- Normal: for a balanced drive that offers a compromise between performance and energy efficiency. WLTP range is validated in this mode.
- ECO: for maximum range and energy efficiency. The ECO mode deactivates all unnecessary energy-consuming features and reduces the top speed, torque and overall performance.

Braking

Energy recuperation

The regenerative braking system works when the vehicle is in motion, energy created by the resistance of the brakes against the drivetrain is converted into DC voltage to partially recharge the battery. The driver can also engage braking mode through the drive selector to increase the level of energy recuperation.

Single foot driving experience

The system not only utilises the energy when the brakes are being used, but also engages when the vehicle is coasting, recovering more energy and enabling single foot driving as the brakes automatically engage when the throttle pedal is released.

DRIVETRAIN	COMBO LIFE EV
CO2 emissions	0g / km
Max power kW / PS	100 / 136
Max torque Nm / lb.ft.	260 / 192
Acceleration 0 - 100km/hr	11.7
Transmission	135
Service Interval	Automatic electric drive with fixed gear ratio
Electric range	Every 40,000km or 2 years (whichever comes sooner) Initial inspection at 20,000 miles or 1 year (whichever comes sooner)
Gross Vehicle Weight (KG)	2366

Battery	COMBO LIFE EV
Battery energy kWh	50
EV range (WLTP preliminary)	280
Battery consumption	17.5 - 19.4 kWh / 100km
Battery warranty	8 years / 160,000km / 70% capacity

Charging	COMBO LIFE EV
Domestic 13 amp 1.8kWh	31 hours
Wallbox 32 amp single phase	7 hours 30 minutes
Wallbox 16 amp three phase	5 hours
Rapid 0 - 80% 100kWh	30 mins

E&OE July 2023. The Combo-e Life is a battery electric vehicle requiring mains electricity for charging. Range data given has been determined according to WLTP test procedure methodology. The figures shown are intended for comparability purposes only and should only be compared to other cars tested to the same technical standard. The range you achieve under real world driving conditions will depend upon a number of factors, including but not limited to: the accessories fitted (pre and post registration); charging frequency; personal driving style; vehicle load and route characteristics; variations in weather; heating/air conditioning; pre-conditioning and battery condition. For more information, contact your local Opel Retailer. You can obtain 15-80% of the vehicle charge in 30 minutes from a 100kW rapid charging station and 15-80% of the vehicle charge in 45 minutes from a 50kW rapid charging station.
