e-INFO³

From battery status to energy usage: the easy-to-understand vehicle data monitors provide the driver with the best possible overview in order to ensure maximum range and efficiency.

¹Energy consumption Corsa-e (combined) 16,5–16,8 kWh/100 km, CO₂ emission 0 g/km, range (combined) 329 km to 337 km (depending on equipped options). The range and electric consumption figures mentioned comply with the WLTP test procedure, on the basis of which new vehicles are type-approved from 1 September 2018. They may vary depending on actual conditions of use and on different factors such as: speed, thermal comfort on board of the vehicle, driving style and outside temperature. The charging time depends in particular on the power of the charger on board of the vehicle, the charging cable and the type and power of the charging station used. Please contact your dealer for further information.

²Theoretical value calculated based on 329 km to 337 km WLTP range (depending on equipped options). At a DC fast charger (100 kW). Reflects charging from empty. The charging time may vary according to the type and power of the charging station, the outside temperature at the charging point and the battery temperature.

³Available with Multimedia Navi or Multimedia Navi Pro.
