

OPEL VIVARO-e

Price and Specification Guide | Ireland | May 2023

[FIND OUT MORE](#)

O P E L

Customer Notice:

Dear customer,

The enclosed Price and Equipment Guide reflects Irish pricing and specification in normal circumstances.

Please be advised however, Opel is impacted by temporary challenges in the global supply chain, including certain component shortages. Unfortunately, in the first instance, this means some customers may experience significant delays to delivery.

In the second instance, due to the present production challenges, some options for models across the Opel range are unavailable until further notice. Furthermore, Opel may temporarily offer vehicles with substituted equipment or features in place of standard equipment, or may suspend features temporarily.

These are measures taken to secure production of vehicles for customers.

As information becomes available from our manufacturer and working with our partners in the Opel Dealer Network in Ireland, Opel Ireland will endeavour to keep customers up to date regarding the order status and equipment featured on their new vehicles.

CONTENTS

DISCOVER THE OPEL VIVARO-e.

With uncompromising character and emission free driving, the new Opel Vivaro-e is ideal for the urban environment and beyond. Available in two vehicle lengths and with two battery sizes for a range of up to 330 km (WLTP), the new Opel Vivaro-e is the premium choice for businesses with the highest professional standards.

Due to the limitations of the printing process, the colours reproduced may vary slightly from the actual paint colour and trim material. As a result, they should be used as a guide only. Your Opel dealer has a comprehensive display of paint finishes.

VIVARO-e SPECIFICATIONS

Single-speed electronic drive selector

As the motor is an all-electric single-speed drive unit, there is no need for multiple gears. Instead, the shifter lets the driver select from the following:

- Park
- Reverse
- Neutral
- Drive
- Braking (for increased regenerative braking)

Drive Mode Selector

The driver can determine the driving style through selecting one of the following modes:

- Power: with high power reserves for the highest top speed and torque. Recommended at full capacity.
- Normal: for a balanced drive that offers a compromise between performance and energy efficiency. WLTP range is validated in this mode.
- ECO: for maximum range and energy efficiency. The ECO mode deactivates all unnecessary energy-consuming features and reduces the top speed, torque and overall performance.

Braking

Energy recuperation

The regenerative braking system works when the vehicle is in motion, energy created by the resistance of the brakes against the drivetrain is converted into DC voltage to partially recharge the battery. The driver can also engage braking mode through the drive selector to increase the level of energy recuperation.

Single foot driving experience

The system not only utilises the energy when the brakes are being used, but also engages when the vehicle is coasting, recovering more energy and enabling single foot driving as the brakes automatically engage when the throttle pedal is released.

DRIVETRAIN	50KWH	75KWH
CO2 emissions	0g / km	0g / km
Max power kW / PS	100 / 136	100 / 136
Max torque Nm / lb.ft.	260 / 192	260 / 192
Acceleration 0 - 100km/hr	13.1	14.3
Max speed kph	130	130
Transmission	Automatic electric drive with fixed gear ratio	
Service Interval	Every 40,000km or 2 years (whichever comes sooner) Initial inspection at 20,000 miles or 1 year (whichever comes sooner)	
Max payload KG	1226 (L1H1): 1198 (L2H1)	1000 (L1H1): 1002 (L2H1)

Battery	50KWH	75KWH
Battery energy kWh	7.4kW	7.4kW
EV range km (WLTP)	230	330
Battery warranty	8 years / 160,000 km / 70% capacity	

Charging	50KWH	75KWH
Domestic 13 amp 1.8kWh	28 hours	42 hours
Wallbox 32 amp single phase	7 hours 30 minutes	11 hours 20 minutes
Wallbox 16 amp three phase	4 hours 45 minutes	7 hours
Rapid 0 - 80% 100kWh	30 minutes	45 minutes

E&OE May 2023. The Vivaro-e is a battery electric vehicle requiring mains electricity for charging. Range data given has been determined according to WLTP test procedure methodology. The figures shown are intended for comparability purposes only and should only be compared to other cars tested to the same technical standard. The range you achieve under real world driving conditions will depend upon a number of factors, including but not limited to: the accessories fitted (pre and post registration); charging frequency; personal driving style; vehicle load and route characteristics; variations in weather; heating/air conditioning; pre-conditioning and battery condition. For more information, contact your local Opel Retailer. You can obtain 15-80% of the vehicle charge in 30 minutes from a 100kW rapid charging station and 15-80% of the vehicle charge in 45 minutes from a 50kW rapid charging station.
